## ABOUT SCITEC

SCITEC NUTRITION® has been manufacturing its premium quality products since 1996 and has become one of the biggest producers of whey protein formulas. Our quality guarantee is based on our manufacturing and in-house laboratory capability. SCITEC has 500 product variants and growing: massive selection of potencies, flavors and sizes! Since fall 2010 SCITEC has an exciting, industry-leading look! All in all, SCITEC is the fastest, guaranteed way FOR YOU to achieve YOUR GOALS!

## ABOUT SCITEC

## WHY YOU'RE GUARANTEED TO HAVE THE BEST RESULTS WITH SCITEC!

SCITEC NUTRITION® guarantees its quality by manufacturing in its own facility! We are also one of the few companies in the world that lab tests all batches of its proteins and you, the customer can look up your product's

result on our website! Be aware that if your protein's label claim is off more than a couple of percent, you may be eating dozens of grams of unwanted sugar or fat daily!

A black and white photograph of a person's back and arm next to a bare tree. The person is on the left, with their back to the camera, showing their shoulder and arm. The tree is on the right, with its bare branches reaching upwards. The background is a bright, overexposed sky.

## SUPER 7

### Functionally-enhanced protein super-matrix

SUPER 7 is a premium protein super-matrix consisting of 7 types of quality, animal protein sources, including whey, casein, total milk and egg white proteins, and it's also turbo-charged with the patented PeptoPro® protein hydrolysate! PeptoPro® is enzymatically "predigested" so it mainly consists of small amino acid peptides. Our proteins have various amino acid and absorption-time profiles, and different anabolic/anti-catabolic characteristics ranging from super fast-digesting anabolic to slow-digesting anti-catabolic. Since the amino acid compositions and absorption kinetics complement each other, the end result is an all-around, balanced protein formula that can be used any time during the day, including before going to bed. Also, SUPER 7 is ideal for both muscle gaining and dieting training phases, and to generally enhance athletic performance and recovery!

What separates SUPER 7 further from any other protein formula is the addition of several functional ingredients. One group includes essential fatty acids. Conjugated linoleic acid (CLA) is known for its body weight management properties, which include decreasing body fat and increasing lean muscle mass! Flax seed oil is a great source of Alpha Linoleic Acid (ALA) that's an essential fatty acid required for optimal body functions. In the other group of functional active ingredients, we have the digestive enzymes bromelain and papain that aid in the actual utilization of amino acids from proteins! Also, enzymes may help to deal with the soft tissue problems in our bodies that result from training trauma, so recovery and performance will be further enhanced. One other unique feature of the chocolate SUPER 7 is the extra high cocoa content. It has been scientifically proven that the antioxidant concentration in cocoa is great. To top it all off, SUPER 7 is made without aspartame and has a superb flavor and extra creamy texture!

**Flavors:** milk chocolate

**Sizes:** 1300 g – 43 servings

#### Supplement Facts

Serving size: 30 g (approximately 1 level scoop)

# HOS: HORMONE OPTIMIZATION SYSTEM

## Natural hormone production, anabolic and anti-catabolic processes optimizer product pack

The HOS trio pack contains special versions of D-TEST, ESTRO DIM and ANABOL-X.

**D-TEST:** Potent, natural anabolic hormone booster (testosterone and growth hormone).

**Sizes:** 100 capsules – 25 servings

**ESTRO DIM TS:** Estrogen management, detoxification and maximum testosterone formula with Tribulus (Tribulus is only included in this TS version in this trio pack!)

**Sizes:** 100 capsules – 25 servings

**ANABOL-X:** Pure muscle growth stimulator with HICA (anabolic, anti-catabolic).

**Sizes:** 75 capsules – 25 servings

Taking these 3 product simultaneously makes it possible to have maximum results both in phases of training for lean muscle mass and strength, and also when dieting to shed the most bodyfat! The naturally possible fastest rate of actual muscle building, or a „hard looking” physique will be the result.

### Supplement Facts:

L-Leucine, Alpha-Hydroxy-Isocaproic Acid (HICA), Beta-Hydroxy Beta-Methylbutyrate (HMB)		

† Daily Value not established.

## D-TEST

### Potent, natural anabolic hormone booster

D-TEST is a legal, natural booster of anabolic hormones: testosterone and growth hormone! It contains D-aspartic acid (DAA), which is a non-essential, naturally occurring amino acid in our food sources that is found mainly in the pituitary gland, hypothalamus and testes in the body. D-aspartic acid binds to specific, so-called NMDA receptors. In the hypothalamus the stimulation of NMDA receptors leads to the production of Gonadotropin Releasing Hormone (GnRH). It instructs the pituitary gland to release Luteinizing Hormone (LH) and Follicle Stimulating Hormone (FSH). LH and FSH in the testicles initiate the process that leads to the release of testosterone. Stimulation of NMDA receptors in the hypothalamus also leads to the release of Growth Hormone Releasing Hormone (GHRH) that promotes the release of growth hormone. The NMDA receptors' best stimulation is achieved when besides DAA, the glycine binding site activator N-methylglycine is added to the formula! What's great about D-TEST is that the main ingredient is clinically proven to be effective and safe in human studies where young (in their 20's and 30's) males were the subjects. So if you want to be more muscular with less fat, and/or want a very potent sexual performance stimulator, D-TEST is your weapon!

**Sizes:** 120 capsules – 20 servings

#### Supplement Facts

Serving size: 6 capsules

Amount per serving	% Daily Value
D-Aspartic Acid	3000 mg †
N-methylglycine	1350 mg †

## SWOLEX

### Örületes bedurránás az új NITRABOLIKUS kreatin-nitráttal!

Garantált brutalitás az igazán ütős nitrogén-oxid (NO) fokozókkal!

A kreatin-nitrát a létező két legjobban oldódó és ezáltal hasznosuló kreatin egyike. A kémiai kötésben lévő két hatóanyag azt éri el, hogy az izomsejtek belül maximális lesz az anabolikus hatású és azonnali méret növelő hidratáció, míg a sejten kívüli térben nem lesz vizes puffadás, így a kinézet sem romlik el a brutális méret- és erő-növekedés ellenére sem!

A kreatin-nitrát sajátos előnye az is, hogy a nitrát a hagyományos nitrogén-oxid fokozóktól teljesen eltérő módon hatva tángítja az ereket és okoz hosszú órákon át bedurránást és elképesztő ereztettséget.

Enhez jön hozzá a SWOLEX egyedi formulában a citrullin-malát, mely megint csak egy dupla-erejű kötött molekula. A citrullin jobb arginin szint emelő a testben, mint az arginin maga (vagy a változatai), így a hagyományos nitrogén-oxid szint emelés is a legtokéletebben kerül megvalósításra. A malát rész pedig a sejt-energia termelést optimalizálja a kiöböröző edzés-teljesítményhez.

A C-vitamin a termékben a potenciális nitrát hozzászokást hivatott akadályozni. **Kiszerelés:** 108 kapszula – 18 adag, 200 kapszula – 33 adag

#### Supplement Facts

Serving size: 6 capsules

Amount per serving	% Daily Value
Kreatin nitrát	3000 mg †
Citrullin malát	1710 mg †
C-vitamin (aszkorbinsav)	60 mg 100%

† Daily Value not established.

# ESTRO DIM

## Estrogen management and detoxifying formula

Estrogen management and detoxification are important for general health and good looks. Hormonal imbalances can retard fat loss and cause bloating among other things. D-glucarate is a substance that supports cleansing via a detoxification mechanism called glucuronidation. Glucuronidation removes several toxic and potentially toxic chemicals from our system, also "used" hormones such as estrogens, androgens, T4, some steroids, bilirubin, bile salts, certain drugs, xenobiotics and environmental toxins.

Diindolylmethane (DIM) favorably effects estrogen metabolism and induces liver detoxification enzymes to help neutralize harmful estrogen metabolites and xenoestrogens (bad estrogen-like environmental chemicals). DIM may promote healthy testosterone levels, optimal estrogen metabolism, and efficient fat loss!

### Sizes:

100 capsules – 100 servings

Nutrition facts are on page 158.

# ANABOLIC-X

## Pure muscle growth stimulator with HICA!

ANABOL-X is a three-pronged, pure muscle growth stimulator! It is natural and non-hormonal, so it can be taken by anyone safely. We've included scientifically proven ingredients only! According to studies, in 4 weeks HICA significantly increased bodyweight and overall lean body mass, while fat mass remained constant. HICA supplementation also decreased DOMS that is the occurrence of muscle soreness 24-48 hours after training.

HMB is also an anabolic, anti-catabolic agent that performs well during hard training to maximize muscle mass and strength gains, decrease potential muscle loss, preferentially burn more fat, and boost recovery.

L-Leucine is one of the essential amino acids and also belongs to the BCAA group. Cutting-edge scientific results prove that Leucine is one of the most important aminos, because it actually directly stimulates skeletal muscle protein synthesis, the Leucine level in the body signals an anabolic state. Leucine promotes recovery and protects muscle tissue from breakdown (anti-catabolic effect). Isolated Leucine has been found useful even when the overall dietary protein intake is high, and even when you add it to fast digesting protein shakes. Leucine can also be used by muscles for energy when engaging in high intensity activity.

The synergistic effect of these 3 scientifically proven ingredients in ANABOL-X guarantees that you will maximize your lean muscle mass and strength gains without your body fat getting out of hand!

**Sizes:** 90 capsules – 30 servings

Nutrition facts are on page 158.

SCITEC NUTRITION

# PROTEIN FORMULAS

12-27

# 100% WHEY PROTEIN PROFESSIONAL

## Excellent quality whey protein blend with extra key amino acids and digestive enzymes

100% Whey Protein Professional is an excellent quality cold-processed whey protein blend with whey concentrate and isolate. Whey protein is considered the king of all bodybuilding proteins as it has the highest biological value (BV). Whey protein has great amino acid profile and higher BCAA (isoleucine, leucine, valine) concentration than any other protein source. The amino acid profile of this protein is excellent. It contains an abundance of so called anabolic amino acids (BCAA's, arginine, glutamine, etc.)

100% Whey Protein Professional contains approximately 10% intact immunoglobulin protein microfraction that helps to support the body's immune system. Whey protein also has the ability to enhance endogenous glutathione production. Glutathione is the most powerful naturally occurring anti-oxidant in the body. 100% Whey Protein Professional also contains quadrapeptides which have been shown to have a pain-killing effect, thus your soreness after an intense workout can be decreased.

100% Whey Protein Professional also has a low percentage of lactose, and is fortified with an "Anabolic Amino Matrix": leucine, glutamine and taurine, the most important protein synthesis stimulating and muscle cell volume boosting amino acids in human muscle tissue! The digestive enzyme blend guarantees that the actual utilization of amino acids is optimal, because "you are what you digest and not what you eat!"

Aspartame free formula!

# ANABOLIC WHEY

## "Instantly anabolic" protein

Milk proteins – especially whey protein – are THE bodybuilding protein, no question about it. And Anabolic Whey is THE supplement to take if your goal is to increase your lean muscle mass, burn fat and boost your health, because it provides milk proteins, mainly high-quality whey proteins. Anabolic Whey has the highest biological value among protein sources and it only makes sense to supplement with whey protein because it's a type of protein one cannot ingest from regular food in any significant amount. Anabolic Whey is full of the right amino acids, protein microfractions and peptides, and it's fortified with glutamine and taurine, two abundant amino acids in human muscle that are responsible for the anabolic cell-volumizing effect. Anabolic Whey is easy to digest, it mixes instantly and comes in fantastic flavors.

# ZERO CARB ZERO FAT ISOBEST

**Best of the best whey protein isolate**

Supplement companies love to play marketing games with protein percentages and many times they disregard the approximately 5% moisture content that is naturally present in powders, but can be dried out in a lab resulting in a protein concentration claim that is 5% higher than it actually is ("as is") in real life for the customers. However, in our ZERO CARB/ZERO FAT ISOBEST the whey protein isolate is truly well over 90% concentration "as is" so we are able to give you a finished protein shake formula that is 90% protein! Additionally, ISOBEST has zero fat and zero carbohydrates meaning that it has no lactose or cholesterol either. This highest quality whey protein isolate – processed using a low pressure and low temperature combination of cross-flow ultrafiltration and microfiltration techniques – provides all the crucial amino acids and biologically active protein microfractions including beta lactoglobulin, alpha lactalbumin, bovine serum albumin, immunoglobulin G, lactoferrin and glycomacropeptide.

## NEW FORM

**Diet protein shake with fat burners and prebiotic fiber**

NEW FORM is a diet support shake with a very high-quality protein blend, a fat burner ingredient matrix, and a good dose of appetite blunting fiber. This fiber – inulin – is water soluble, but resistant to digestion. It reaches the large intestine intact where it is acted upon by bacteria. Inulin is therefore a prebiotic, it stimulates the growth of healthy intestinal bacteria that support good colon health. Our fat burner matrix is responsible for further appetite suppression, fat burning facilitation, carbohydrate and insulin management, and also provides an energy boost.

# 100% WHEY PROTEIN PROFESSIONAL

LIGHTLY SWEETENED (LS)

**Excellent quality ultrafiltered whey protein with extras**

100% Whey Protein Professional (100% WPP) is an excellent whey protein concentrate. Whey protein has great amino acid profile and higher BCAA (isoleucine, leucine, valine) concentration than any other protein source. The amino acid profile of this protein is excellent. It contains almost an abundance of so called anabolic amino acids (BCAA's, arginine, glutamine). 100% WPP contains an immunoglobulin protein microfraction that helps to support the immune system. Whey protein also has the ability to enhance endogenous glutathione production. Glutathione is the most powerful naturally occurring anti-oxidant in the body. 100% WPP also has a low percentage of lactose, and is fortified with an "Anabolic Amino Matrix": leucine, glutamine and taurine, the most important protein synthesis stimulating and volume boosting amino acids in human muscle tissue! LS is a lightly sweetened version with less intense flavor. Aspartame free!

**Flavors:** chocolate, vanilla

**Sizes:** 920 g – 30 servings,

2350 g – 78 servings, 5000 g – 166 servings

**Nutrition facts are on page 158.**

# ANABOLIC KICK START

**Optimized post-workout protein formula**

ANABOLIC KICKSTART is designed to quickly switch your body into a muscle building state after training when otherwise catabolic processes dominate. With the optimal combination of two of the greatest bodybuilding proteins, ANABOLIC KICKSTART takes care of both stimulating anabolism and stopping catabolism, two distinct processes. Whey is a fast absorbing anabolic protein, it triggers tissue synthesis. Casein is a slow absorbing protein that is more anti-catabolic, meaning that it attenuates the catabolic state that's present after hard training. Our high quality whey provides all the crucial amino acids and biologically active protein microfractions. Casein provides a sustained release of amino acids into the bloodstream up to 7-8 hours. Casein is high in the crucial branched-chain amino acids (BCAA's) and very high in glutamine, a practically essential amino acid very important to muscle building. If you use pre- and intra-workout nutrition (including protein or amino acids), it may be preferable to include casein in the post-workout shake. ANABOLIC KICKSTART is also fortified with extra amounts of BCAA's and glutamine!

**Flavors:** triple chocolate

**Sizes:** 1060 g – 20 servings

**Nutrition facts are on page 158.**

# 100% WHEY ISOLATE

## Supremely anabolic protein

Our 100% Whey Isolate protein formula was designed with two main goals in mind: to provide a truly high concentration of protein in a flavored formula, and to allow the user to ingest a protein that causes the most significant and fastest muscle amino acid influx and therefore the biggest anabolic protein synthesis boost. The special protein source in 100% Whey Isolate has unique amino acid absorption kinetics, the whey peptides are actively transported into the blood-stream and to the muscles. Faster, better amino acid absorption and utilization equal better gains! 100% Whey Isolate protein is low in lactose, fat and carbohydrates. It's also ultra convenient because it mixes with a spoon or simply in a bottle, no blender or shaker required.

### Flavors:

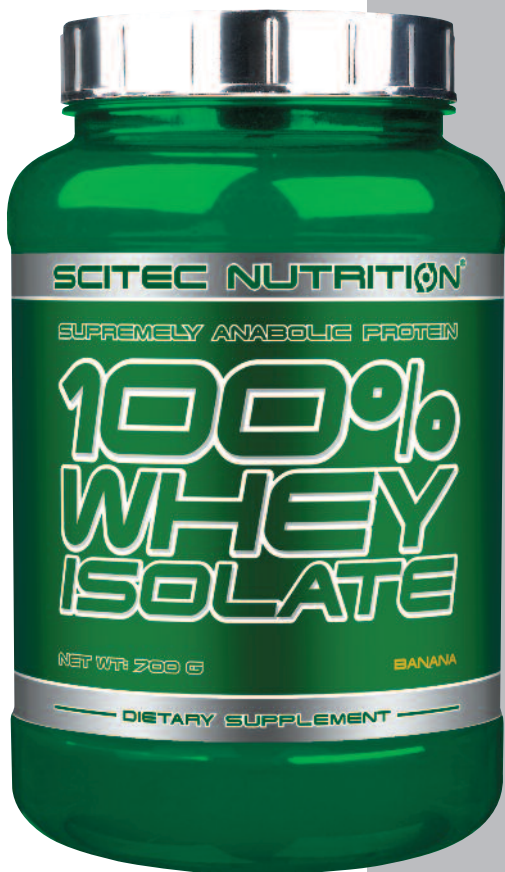

chocolate, vanilla, strawberry, banana, raspberry

# 100% WHEY PROTEIN

## Ultrafiltered whey protein

100% Whey Protein is an excellent quality ultrafiltered whey protein concentrate. Whey protein is considered the king of all bodybuilding proteins. Whey protein has a better amino acid profile and higher (25%) BCAA concentration (leucine, isoleucine, valine) than any other protein source. 100% Whey Protein contains approximately 10% intact immunoglobulin protein microfraction which helps to support the body's immune system. Whey protein also has the ability to enhance endogenous glutathione production. Glutathione is the most powerful naturally occurring anti-oxidant in the body. 100% Whey Protein contains quadruple peptides, which have been shown to have a pain-killing effect, thus your muscle soreness after an intense workout can be decreased. 100% Whey Protein's amino acid profile is excellent, it contains high amounts of so called anabolic amino acids (e.g. BCAA's, arginine, glutamine). Whey protein has the highest biological value (BV). 100% Whey Protein has a low percentage of lactose, and is fortified with glutamine and taurine, two abundant amino acids in human muscle that are responsible for the anabolic cell-volumizing effect.

### Flavors:

- chocolate, vanilla, strawberry, tiramisu, white chocolate, milk chocolate, chocolate mint, peanut butter, orange creamsicle, rocky road, rum melon, apple cinnamon: 30 g, 920 g, 2350 g, 5000 g
- grapefruit, egg-nog, root beer, cookies & cream, unflavored: 30 g, 920 g

### Sizes:

30 g single-serving sachets,  
920 g – 30 servings,  
2350 g – 78 servings,  
5000 g – 166 servings

## EGG PRO

### The gold standard non-milk source protein

The original gold standard of proteins! Egg white protein is the greatest alternative to milk proteins (whey, casein and their mixtures). Use egg protein if you are intolerant to milk or lactose. Egg protein provides an excellent combination of amino acids with all eight essential amino acids and high levels of important sulfur-containing amino acids.

## ÜBER MILK

### Micellar casein and whey containing milk isolate

ÜBER MILK is a premium milk protein isolate! Milk may be one of the greatest muscle building foods ever. It naturally contains a ratio of 80% casein and 20% whey protein. Our gently ultrafiltered milk protein isolate preserves this ratio and provides the casein as undenatured micellar casein (instead of denatured, lower quality caseinate), because the product is not treated with chemicals. This also means it's rich in whey and casein protein microfractions. This protein source is of such quality that it's even used in infant formulas!

Since ÜBER MILK is predominantly slow-digesting micellar casein, it provides a constant stream of amino acid release up to 7-8 hours that is a strong anti-catabolic feature. Therefore ÜBER MILK is ideal for dieting and for feedings that are not immediately prior to or after training (e.g. meals during the day and before bed).

# PRO LONG

## Anti-catabolic & night-time sustained release protein

Scientific studies into nutrient timing and protein types have provided us with tools to maximize training effects. Our PRO LONG 100% casein protein is a slow-digesting type (as opposed to fast whey proteins) that provides a sustained release of amino acids into the bloodstream up to 7-8 hours. It makes casein ideal when meals are too far apart for some reason, or before going to bed. If you use pre- and intra-workout nutrition (including protein or amino acids), it may be preferable to include casein as the post-workout protein. The slower digestion makes casein more anti-catabolic than fast proteins and the amino acid utilization from the protein is more efficient.

Casein is high in the crucial branched-chain amino acids (BCAA's) and very high – higher than whey – in L-glutamine, a practically essential amino acid very important to muscle building.

## PROTEIN DELITE

**The world's best tasting gourmet protein shake with real fruit or chocolate pieces!**

Modern society has created a situation in which we find less time for exercise and at the same time, we are experiencing increased stress levels. One of the first things we compromise, because of this lack of time and increased stress, is our health. Our eating habits have deteriorated. It is no wonder that more and more people become overweight, develop high blood pressure, heart disease and strokes. Despite this, the last thing we want to give up is delicious food, especially sweets! Luckily we offer you the best tasting, healthy protein shakes. While dieting, you can still have the delicious, mouth-watering taste of "forbidden" food – sweets! Protein Delite will satisfy your sweet tooth without causing you to gain fat, allowing for a healthier, shapelier physique. Each flavor of Protein Delite contains real fruit pieces or chocolate bits. The protein source is the combination of the highest quality, slow- and fast-released proteins that provide the necessary nutrients for your muscles.

# PROVARIA

## Anabolic & anti-catabolic premium protein matrix

PROVARIA is a premium protein matrix providing 6 types of quality protein sources: whey protein concentrate, whey protein isolate, total milk protein isolate, casein, egg protein and soy protein isolate. These sources have various amino acid and absorption time profiles, and different anabolic/ anti-catabolic characteristics from fast-digesting anabolic to slow-digesting anti-catabolic. Since the amino acid compositions and absorption kinetics complement each other, the end result is an all-around, balanced protein formula that can be used any time during the day, including before going to bed. Also, PROVARIA is ideal for both muscle gaining and dieting training phases.

# SOY PRO

## Complete, non-animal source protein isolate

Our soy protein isolate is a water-extracted, non-genetically modified product. We offer this protein as an alternative to animal sources for vegetarians, and for people with lactose intolerance or maybe milk allergies, or simply for those who seek an economical complete protein source. Soy protein is high in the critically important branched-chained amino acids (BCAA's) as well as glutamine and arginine. SOY PRO is fortified with taurine. All in all, soy isolate is a high-concentration, high-quality, easily and quickly digestible non-animal protein source with great amounts of important amino acids.

# MYOMAX

## All-in-one anabolic meal replacement formula

MyoMax delivers 40 grams of the highest quality cold-processed ultrafiltered whey protein concentrates and cross-flow microfiltered undenatured whey protein isolate both rich in protein microfractions. An extra 9000 milligrams of amino acids are added yielding a total of 49 grams of amino acid sources providing nutrition for your muscles.

MyoMax contains a total of more than 12 grams of branched-chain amino acids (BCAA's: leucine, isoleucine, valine) per serving, the first amino acids used up during intense training. MyoMax provides 12 grams of glutamine per serving, the most abundant amino acid in muscle cells that plays a key role in cell-volumization and fueling the immune system. MyoMax provides 7.5 grams of the purest creatine monohydrate and the necessary amount of insulin-spiking dextrose and phosphates to create an optimal environment for maximal creatine utilization.

MyoMax contains a precise amount of ribose. This direct cell-energy supplement is similarly powerful for athletes as creatine. Ribose aids both the new synthesis and the salvage of nucleotides such as RNA, DNA and ATP thus providing energy for cells and boosting recovery time. Ribose is synergistic with creatine, so the end result of their combined use will be more significant than the total effects of these substances separately.

Arginine, a nitric oxide (NO) precursor is present in significant amount in MyoMax. It's effective in improving tissue blood supply, physical exercise capacity and recovery. With the addition of insulin-mimicking and cell-volumizing taurine, MyoMax becomes the king of all engineered foods!

Visit our website (ScitecNutrition.com) to see the incredible MyoMax body transformation results in our SCITEC TEST!

# MYOMAX PROFESSIONAL

## The most anabolic all-in-one formula

MyoMax™ Professional is the state-of-the-art version of our all-inclusive, bulletproof formula that takes the guesswork and hassle out of your everyday supplementation program. Drink this product and you're ready to grow!

MyoMax™ Professional delivers 40 grams of the highest quality whey protein concentrates and isolates (CFM® WPI) both rich in protein micro-fractions. Nine grams of amino acids are added yielding a total of over 49 grams of protein and amino acids providing nitrogen for your muscles.

Enhanced with our BCAA XPRESS Essential Amino matrix, MyoMax™ Professional contains more than 12 grams of branched-chain amino acids per serving, the first amino acids used up during intense training, and drivers of protein synthesis.

MyoMax™ Professional contains almost 14 grams of glutamine per serving, the most abundant amino acid in muscle cells that plays a key role in cell volumization and fueling the immune system. This is not simple L-glutamine that is mainly used up by the intestines, but our famous G-BOMB super glutamine matrix with different – more stable and bioavailable – glutamines.

MyoMax™ Professional provides 7.5 grams of the purest creatine with the necessary dextrose and now Vitargo® (designer fast digesting carbohydrate) to create an optimal environment for creatine utilization. The creatine component has been upgraded to our best selling ATTACK! multi-vector creatine matrix in this formula!

Arginine, a nitric oxide precursor is present in significant amount in MyoMax™ Professional. It's effective in improving tissue blood supply and oxygenation. It also increases physical exercise capacity and shortens recovery time. Instead of simple arginine, we now have the HEMO-NO nitric oxide booster arginine complex for maximum nutrient transport and incredible pumps.

MyoMax™ Professional has been made better with the inclusion of the time-released, low glycemic/insulin index Palatinose™ designer carbohydrate that provides long lasting energy and prevents blood sugar from crashing.

Also, MyoMax™ Professional features the hottest new ingredient, the carnosine booster beta-alanine that is a super effective strength and performance enhancer.

With the addition of taurines MyoMax™ Professional becomes the king of all "engineered foods". This formula is aspartame free!

## MANNA

### A complete meal with the perfect nutrients

MANNA is a perfect meal – and that says it all! Our formula is a complete, healthy meal that can be consumed at any time of the day to support your activities, and to help maintain or improve your body shape and function. With a very high-quality protein source (ultrafiltered whey protein), and a slow-digesting, low-glycemic index, fiber providing carbohydrate type (oat flour), you can effortlessly achieve your nutritional and physique goals. MANNA is delicious so you won't want to miss a meal or cheat on your diet. Aspartame free formula!

## MYOMAX MEAL

### High-protein meal replacement shake

MyoMax Meal is based on the principles of healthy nutrition and effective dieting. Losing bodyfat and staying in shape requires one to consume less calories, carbohydrates and fat while providing enough essential protein. MyoMax Meal contains 48 grams of the best quality whey proteins: ultrafiltered whey protein concentrate and whey protein isolate. MyoMax Meal has a reduced amount of carbohydrates. This ratio is ideal for fat loss while preserving muscle mass that keeps up metabolic rate and calorie burning. The protein source is fortified with several amino acids responsible for protein synthesis, anti-catabolism and immune system boost. The bottom line is that you get the highest biological value protein that's easily digestible and won't cause gastric distress.

**Flavors:** french vanilla, double dutch chocolate

**Sizes:** 1560 g – 20 servings – for men  
40 servings – for women

# JUMBO

## Be the biggest thing

JUMBO means BIG! JUMBO means STRONG! It's a scientific fact that people underestimate their nutrient intake when dieting, but also overestimate their actual food consumption when trying to gain muscle and brawn. In other words, they eat less than they think and they need for steady and significant progress! Everybody seeks the magic bullet while ignoring the fact that nothing is more powerful than the consistent consumption of proper amount of total calories, energizing carbs and muscle building protein. Couple this with the fact that many athletes don't invest time and energy in the proven method of keeping a food log and the only practical solution left for most is to rely on the daily use of a JUMBO type shake that pretty much guarantees that you will have enough nutrients in your system to excel.

With 50 grams of the highest quality protein per serving, a large dose of both fast- and slow-release carbs, the nutritional side of the equation is significantly boosted for you by JUMBO.

JUMBO is designed with fast acting whey protein to make it suitable for use before, during and after training as per the prescription of cutting-edge nutrient timing science. Also, the inclusion of regular solid food in one's diet means that slow-digesting protein sources release amino acids into the bloodstream for a significant number of hours (4-6), supplements should therefore be designed with fast protein sources, especially if we want to use them around training for the greatest gains.

JUMBO contains no sweeteners whatsoever!

**The latest generation muscle and strength gainer for those with more average or athletic metabolism**

We have proven that "JUMBO means BIG! JUMBO means STRONG!" The original JUMBO formula was developed to help those with very fast metabolism ("hardgainers"), or extreme energy demands due to their physical activity levels. The nutrient ratios reflect these purposes. The popularity of the product – stemming from its quality and results – warranted that we develop a specific formula for the more average, athletic metabolisms and demands of the typical bodybuilding training also. And the second member of the JUMBO family, JUMBO PROFESSIONAL was born!

In JUMBO PROFESSIONAL we shifted the ratio towards a higher protein percentage. While providing 52 grams of high-quality protein (more than JUMBO), the Serving size is smaller: 162 grams. This obviously means that the carbohydrate and caloric yield of the formula is lower, because it's unnecessary to take in higher amounts for those people that have the specific body and activity types we had in mind when designing this product. JUMBO PROFESSIONAL features the same "6-CARB" carbohydrate blend with slow and fast digesting oat, Palatinose™ & Vitargo®. The "JUMBO-SIZE" anabolic matrix has been improved and increased!

JUMBO PROFESSIONAL is designed with fast-acting whey protein to make it suitable for use before, during and after training as per the prescription of cutting-edge nutrient timing science. Also, the inclusion of regular solid food in everyone's diet means that slow-digesting protein sources release amino acids into the bloodstream for a significant number of hours (4-6), supplements should therefore be designed with fast protein sources, especially if we want to use them around training for the greatest gains.

Aspartame free formula!

## VOLUMASS 35

### High-protein lean muscle mass gainer and cell-volumizer

Volumass 35 is complete and instant nutrition for your muscles. Volumass 35 has been developed for those athletes that require more nutrients because of their larger muscle mass or higher level of activity. Volumass 35 contains more creatine (2.5 g), more and higher quality protein, and has a higher caloric value. In the process of accumulating muscle mass both protein and carbohydrates have equal importance to provide energy and building blocks for anabolic processes. The 35% protein ratio of Volumass 35 matches the macronutrient ratio of most diet regimens, and the body types and metabolism of most athletes. Volumass 35 therefore provides a perfectly balanced meal by itself and as an integrated part of the whole day's nutrient intake. The protein is derived from high-quality ultra-filtered whey protein concentrate and cross-flow microfiltered isolate both rich in protein microfractions. Creatine is the most effective non-macronutrient supplement ever. It's responsible for providing cellular energy for muscle contractions and boosting cell volume. Taurine is also clinically proven to have a cell volumizing effect on the human body. Volumass 35 has no added fructose or sucrose. Scitec Nutrition's Volumass 35 is a precision controlled blend of nutrients combined with delicious flavor.

# VOLUMASS 35 PROFESSIONAL

## Best of the best whey protein isolate

Volumass 35 Professional is an updated, state-of-the-art product. There's a universally ideal ratio of carbohydrate, protein, amino acids and other depleted substances for this purpose regardless of your goals, training phase, etc. Volumass 35 Professional has been designed to provide these nutrients in perfect balance. Volumass 35 Professional has the best whey proteins, derived from high-quality whey concentrate and cross-flow microfiltered isolate both rich in protein microfractions. Volumass 35 Professional has faster-digesting carbohydrates to quickly replenish glycogen stores and increase the utilization of other nutrients, but also features the new time-released, low glycemic index Palatinose™ carbohydrate that provides long lasting energy and prevents blood sugar from crashing. The creatine component in this formula has been upgraded to our best selling ATTACK! multi-vector creatine matrix! As far as critical amino acids go, Volumass 35 Professional has more than 10,000 mg of BCAA's and close to 10,000 mg of glutamine per serving that includes our famous G-BOMB super glutamine matrix with different – more stable and bioavailable – glutamines. Our product is also fortified with taurine, taurine ethyl ester. This formula is aspartame free!

# MASS

## Muscle gainer for mass and strength

The MASS series muscle gainers are recommended for beginner and intermediate level athletes as practical, easy-to-digest meal supplements for improved performance, muscle and strength gains. MASS contains whey protein that has already proven its superiority among bodybuilding proteins. MASS provides quickly released, energy yielding carbohydrate that makes it ideal around and even during training.

**Flavors:** chocolate, vanilla, strawberry

**Sizes:** 2250 g – 45 servings, 4500 g – 90 servings

# MASS 20

## Creatine-infused muscle gainer

The human body is very sensitive to its energy status. If energy requirements are not optimally met, you will not be able to perform physical activities at a high level, recovery will be impaired and building muscle mass will be impossible. A carbohydrate-based energy supplier and muscle gainer formula, like our MASS 20, will provide the necessary support in these areas. MASS 20 is also infused with creatine that is the most effective direct cell-energy supplement for high intensity activities.

MASS 20 contains whey protein, the most important bodybuilding protein type. Our ultrafiltered whey protein concentrates provide important lactoglobulin, lactoferrin, lactalbumin and immunoglobulin protein microfractions). MASS 20 has no added sucrose or fructose.

**Flavors:** chocolate, vanilla, strawberry

**Sizes:** 1750 g – 35 servings, 4000 g – 80 servings

# MYOMAX GAIN

## Muscle gainer for mass and strength

MyoMax Gain has been developed for active people who require more nutrients to support their larger muscle mass or higher level of activity. MyoMax Gain provides complex and instant nutrition for your muscles. It contains creatine, a high amount of quality protein and has a higher caloric value. The process of accumulating muscle mass and performing at your best requires both protein and carbohydrates. They have equal importance to provide fuel and building blocks for recovery and new muscle tissue synthesis. The protein ratio of MyoMax Gain matches the macronutrient needs of most diet regimens, the body types and metabolism of most athletes. The protein is derived exclusively from the best quality ultrafiltered whey protein concentrate and whey protein isolate both delivering all the important, bioactive protein microfractions. Creatine is the most effective non-macronutrient supplement ever. It provides cellular energy for muscle contractions and boosts cell volume. MyoMax Gain is fortified with taurine, D-ribose and L-arginine.

**Flavors:** double dutch chocolate, french vanilla

SCITEC NUTRITION

# FAT BURNERS

46-53

## PERFECT FATLOSS

### Ultra powerful thermogenic fat burner

PERFECT FATLOSS is a complex, ultra powerful thermogenic fat burner formula. It speeds metabolism (more calories burned) even in the face of caloric restriction; and also optimizes fat and carbohydrate metabolism. A great advantage of PERFECT FATLOSS is the inclusion of a full-strength daily dose of L-carnitine. What's more, it's not just ordinary, basic L-carnitine, but our PENTACARN matrix that provides 5 of the most advanced carnitine forms with extra functionalities! PERFECT FATLOSS also blunts your appetite, and energizes your body and mind for great workouts while dieting.

#### Supplement Facts

Serving size: 4 capsules

Amount per serving	% Daily Value	
Garcinia cambogia extract (60% Hydroxycitric Acid [HCA])	1000 mg	†
"PENTACARN" L-carnitine matrix (L-Carnitine L-Tartrate, Acetyl L-Carnitine, L-Carnitine Fumarate, Glycine Propionyl-L-Carnitine, Propionyl-L-Carnitine)	500 mg	†
Green tea extract [90% polyphenols, 50% EGCG]	200 mg	†
L-tyrosine	200 mg	†
Caffeine (anhydrous)	200 mg	†
Synephrine (citrus aurantium 95%)	21 mg	†
Chromium picolinate	200 mcg	167%

#### Sizes:

120 capsules –  
30 servings

## SATISFACTOR

### Control hunger with award winning PinnoThin™!

SatisFactor with PinnoThin™ allows you to take control of your calories thus lose fat and maintain that reduction. The globally patented and trademarked PinnoThin™ is an all natural ingredient that's derived from Korean pine nut. PinnoThin™ has been frequently awarded for its ability to suppress appetite and aid slimming by promoting a feeling of satiety. In the last few years, the prestigious Health Ingredients Silver Award was given out for PinnoThin™, so was the Frost & Sullivan Award for Best Product Innovation. PinnoThin™ was also awarded with the Slimming Ingredient Germany Award and Highly Commended at the 2007 Dairy Innovation Awards. PinnoThin™ has been clinically investigated extensively to ensure its safety and efficacy for the consumer.

<b>ADIPOKILL super-matrix</b>	<b>1822 mg</b> †
(garcinia cambogia [60% HCA], L-tyrosine, caffeine, green tea extract [ $>50\%$ polyphenols], beta-phenylethylamine HCL, bitter melon, taraxacum officinale 20%, raspberry ketones, cinnamomum burmanni, resveratrol, white willow bark 25%, synephrine [citrus aurantium 95%], glabridin, sclareolide 95%, BioPerine®, chromium picolinate)	

† Daily Value not established.

## REFORM

### Multi-pronged fat attack

Our unique formula helps you to reform your body! Despite the hardest efforts in dieting and training, fat burning may come to a halt because the body adapts by slowing down its metabolic rate. Combining several ingredients with different functions creates a multi-pronged fat attack. Synephrine, caffeine, cayenne and tyrosine are thermogenic and liberate fatty acids. Carnitine transports these fatty acids to be burned off. Lipoic acid manages insulin that's a gateway to fat burning. Hydroxycitric acid slows the deposition of fat from carbohydrates. The powerful combination of CLA (a special fatty acid) and guarana may not only reduce fat cell size, but their number as well!

#### Sizes

60 capsules – 30 servings, 120 capsules – 60 servings

# THERMO-X

## Fatt loss accelerator

Thermo-X is an ephedrine free, but still mildly thermogenic fat loss accelerator formula. Due to its diverse ingredient profile, the advanced Thermo-X formula maximizes the liberation of fatty acids from the adipose tissue and the burning of these fatty acids for energy. Through this and other mechanisms Thermo-X also energizes the body and enhances endurance.

**Sizes:** 100 capsules – 100 servings

L-Carnitine	100 mg	†
Garcinia Cambogia	100 mg	†
(60 mg Hydroxy-Citric Acid active ingredient content)		
Caffeine	35 mg	†
Alpha Lipoic Acid	50 mg	†
† Daily Value not established.		

## HCA

### Hydroxycitric acid

HCA (Hydroxycitric acid) is extracted from the plant *Garcinia Cambogia*. Research has proven that HCA can stimulate the activity of fat-burning enzymes in the body, and inhibits the ATP citrate-lyase enzyme therefore carbohydrates will be less easily deposited as fat. The HCA content of the Scitec Nutrition® HCA supplement is 60%. Inferior brands may contain significantly less active ingredient! Regular use of HCA combined with the right diet and exercise will burn the most fat possible.

#### Sizes

100 capsules – 50 servings

#### Supplement Facts

Serving size: 2 capsules

Amount per serving		% Daily Value
Garcinia Cambogia	1100 mg	†
(660 mg Hydroxycitric Acid [HCA])		

† Daily Value not established.

## HCA-CHITOSAN

### Hydroxycitric acid and chitosan

HCA (Hydroxycitric Acid) is a natural compound extracted from the rind of the fruit called *Garcinia Cambogia*. HCA has the ability to increase the activity of fat-burning enzymes in the body, making the conversion of excess carbohydrates to body fat more difficult. HCA inhibits a certain enzyme, e.g. ATP citrate lyase which is responsible for the conversion of dietary carbs into fat. By inhibiting this enzyme, HCA accelerates the body's own fat losing capabilities. Chitosan on the other hand is derived from chitin, an amino polysaccharide fiber found in the shells of crawfish, lobster and other shellfish. Chitosan goes through a process called deacetylation which refers to the removal of acetyl groups. This process increases activity by improving solubility. Chitosan is an extraordinary fat binder. It has the ability to bind lipids in the stomach before they are absorbed through the digestive system into the bloodstream.

When Scitec Nutrition's HCA-Chitosan is taken prior to eating (preferably lunch and dinner) it can significantly reduce the body's absorption of dietary fats and the conversion of excess carbs into body fat, making this supplement an outstanding fat-loss product.

**Sizes:** 100 capsules – 50 servings

#### Supplement Facts

Serving size: 2 capsules

Amount per serving		% Daily Value
Garcinia Cambogia	840 mg	†
(504 mg Hydroxycitric Acid [HCA])		
Chitosan	300 mg	†

# TEA-X

## Thermogenic green tea

Tea-X is a powerful, standardized green tea extract with minimum 50% polyphenol content including epigallocatechin gallate (EGCG), which is one of the most important polyphenols in tea. Tea-X increases energy expenditure (thermogenesis), burning preferentially fat. Green tea has not been associated with negative effects on the cardiovascular system (such as increased heart rate and blood pressure), or CNS side effects (such as overstimulation and irritability).

### Sizes:

90 capsules – 90 servings

# THERMO-FX

## Fast-acting effervescent fat loss accelerator

THERMO-FX is a fast-acting fat loss accelerator formula. Our unique effervescent technology is responsible for the quick onset of action and also allows the best absorption of the active ingredients.

THERMO-FX is an ephedrine free, but still mildly thermogenic fat loss accelerator formula. Due to its diverse ingredient profile, the advanced Thermo-X formula maximizes the liberation of fatty acids from the adipose tissue and the burning of these fatty acids for energy. Through this mechanism THERMO-FX also energizes the body and enhances endurance.

# BIG BANG

## The world's highest-dose pre workout formula!

BIG BANG! is the ultimate pre-workout intensity maximizer formula that features an amazing matrix of 50 powerful ingredients. BIG BANG! boasts the largest dose of active ingredients in the world without carbs and other “fillers”!

BIG BANG! includes unique creatines and other muscle-cell volumizers; strong stimulants and mental focus enhancers; our novel, 5-component “PENTACARN” L-Carnitine matrix; a serious nitric oxide-boosting blood flow and muscle pump enhancer complex. Additionally, BIG BANG! delivers an ample serving of amino acids (all the essential amino acids), including our famous “G-BOMB” multi-vector glutamine super-matrix. As if it wasn't enough, we have the best fatigue fighters: Beta-Alanine, GAKIC, Creatinol-O-Phosphate and Citrulline Malate. To round out the formula, we added ingredients to optimize insulin sensitivity, testosterone production and active ingredient absorption! BIG BANG! is a very significant source of stimulants, including caffeine! BIG BANG! provides a 6000 mg matrix of various creatines.

# HOT BLOOD

## The only workout maximizer you'll ever need!

If you want to reach the limits of maximum blood volume (insane pumps!), cell volume, strength, energy and mental focus, take only HOT BLOOD! Our sophisticated formula works by supporting the ATP-CP energy pathway and increasing muscle-cell volume; by boosting nitric oxide levels for vasodilation; and by providing stimulant energizers and mental focus enhancers. HOT BLOOD delivers the hottest new ingredient, the muscle carnosine booster beta-alanine that is a super effective strength and performance enhancer.

### Flavors:

- blood orange, grapefruit, orange, pineapple, pink lemonade, tropical punch: 300 g
- guarana, blood orange: 20 g, 820 g

### Sizes:

20 g – 1 serving (packet),  
25x20 g – 25 serving box,  
300 g – 15 servings,  
820 g – 41 servings

### Supplement Facts

Serving size: 20 g (2 heaping scoops)

#### Amount per serving

Calories 70    Calories from Fat 0

## HOT BLOOD kapszula

**The only workout maximizer you'll ever need!**

If you want to reach the limits of maximum blood volume (insane pumps!), cell volume, strength, energy and mental focus, take HOT BLOOD! With our complex formulas our philosophy is to support the relevant metabolic pathways with „multi-vector matrixes” meaning that different substances and different versions of the active ingredients are provided simultaneously to cover all the bases. Our sophisticated formula works by supporting the ATP-CP energy pathway and increasing

muscle-cell volume; by boosting nitric oxide levels for vasodilation (enhanced pumps and nutrient/oxygen transport); and by providing stimulant energizers and mental focus enhancers. HOT BLOOD delivers the best ingredients for fighting the build-up of fatigue and therefore is a super effective strength and performance enhancer. HOT BLOOD arms you with all the cutting-edge ingredients to conquer heavier and heavier weights, and to increase your lean muscle mass and strength to previously unexperienced levels!

### Supplement Facts

Serving size: 5 capsules

# CAFFEINE

## Ultra powerful thermogenic fat burner

It's a little known fact that pure caffeine provides the effects that we expect from coffee. Coffee has hundreds of chemicals in it, some of which cancel out the positive effects of caffeine. However, when pure caffeine is taken in optimal doses, significant performance enhancement, pain and muscle soreness reduction have been proven by studies. Caffeine also stimulates the central nervous system increasing alertness, mental focus, and boosts metabolic rate.

### Sizes:

100 capsules – 100 servings

# NR-PEAK

## Direct cell-energy breakthrough

If there was a cell-energy enhancement breakthrough ever, it's NR-PEAK! Never before have we had the technology to orally „inject“ the cells directly with the fuel they need to live and perform to the max. With the heavily researched and patent-protected MAX ATP at its core, the NR-PEAK formula feeds the cells with ATP, the ultimate energy source at the cellular level. No roundabout ways, detours, conversions and feeding of secondary systems – taking NR-PEAK is like injecting fuel into an engine!

The multiple additional ingredients in NR-PEAK are responsible for elevating muscle-buffering capacity (pH regulation), removing endotoxins, boosting the synthesis of nitric oxide (NO), while increasing blood flow and oxygen delivery.

The synergy of these extremely potent, clinically proven active ingredients will provide an unmatched energy-, performance- and strength-boost with increased time to exhaustion and drastically reduced recovery period between training sessions.

### Supplement Facts

# NITRODRIVE

**Pump, vascularity and performance enhancer**

## Supplement Facts

Serving size: 5 capsules

Amount per serving	% Daily Value
<b>NITRODRIVE SUPER-MATRIX</b> 4000 mg †	
- Citrulline malate	
- Arginine Alpha-Ketoglutarate	
- Glycine Arginine Alpha-Ketoisocaproate	
- Ornithine Alpha-Ketoglutarate	

† Daily Value not established.

You want maximally pumped muscles and mind-blowing vascularity with hot blood rushing through your veins. And not just to see awesome results from your workout immediately, but more importantly to have enhanced oxygen and nutrient transport, and increased recovery. NITRODRIVE contains not one, but three nitric oxide (NO) boosters. Arginine alpha-ketoglutarate and glycine arginine alpha-ketoisocaproate are both advanced forms of arginine. Citrulline also effectively increases arginine levels in the body. Besides driving NO production, arginine is beneficial for the immune system, and – in synergism with ornithine – also increases natural growth hormone production. To support this function, we added the best form of ornithine, ornithine alpha-ketoglutarate (OKG). In its own right OKG is also a growth hormone/IGF-1 booster besides strengthening the immune system and scavenging ammonia. Citrulline malate has been proven to improve performance because it increases aerobic energy production and delays fatigue. It reduces lactic acid and ammonia build up, and speeds muscle recovery by increasing the rate of creatine phosphate and ATP resynthesis.

**Sizes:** 108 capsules – 21 servings

# CITRULLINE MALATE

**Aerobic energy booster**

Citrulline malate has been proven to improve muscle performance because it increases aerobic energy production and delays fatigue. Citrulline malate reduces lactic acid and ammonia build up, and speeds muscle recovery by increasing the rate of creatine phosphate and ATP resynthesis. Also, citrulline malate is more effective at the same dose to increase arginine levels in the body than arginine itself. And as we know, arginine boosts NO (nitric oxide) levels for better pumps, enhanced oxygen and nutrient delivery.

**Sizes:**

90 capsules – 30 servings

## Supplement Facts

Serving size: 3 capsules

Amount per serving	% Daily Value*
<b>Citrulline malate</b> 3000 mg	†

\* Percent Daily Value not established

# ISOTEC

## Isotonic energy & fluid replacement drink

Both intensive weight training and endurance exercise quickly deplete the body's energy stores, and lead to water and electrolyte loss. Hot and humid environments further increase this scenario that results in a sudden and significant drop in performance. Therefore, it is of paramount importance for those interested in performing at their best and developing their physiques to the max to continually replenish all lost vital substrates. However, it takes a well-thought out formula to solve the problems presented by the fact that it is used during exercise. Not iso-osmotic solutions lead to gastric distress and inferior intestinal absorption of the energy-rich carbohydrates and fluid. The Isotec formula is isotonic meaning that the saturation of the solution is equal to that of the human blood so it can easily be absorbed by the body. Isotec provides a tri-carb source that guarantees sustained release of energy, and replenishes both muscle and liver glycogen stores. The electrolytes replenish the amount lost with sweat, and improve fluid absorption and retention. Drinking an ice-cold Isotec drink primes you to perform at your best and finish training on a high by cooling the body and replenishing all lost nutrients.

**Flavors:** lemon ice tea, orange **Sizes:** 1000 g – 30 servings

Nutrition facts are on page 159.

# VITARGO!

## The best carbohydrate for energy and glycogen loading

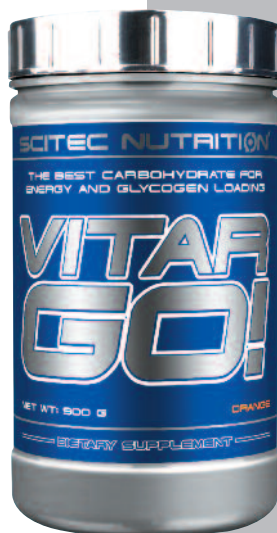

Supplement Facts

Vitargo® is a unique, patented high molecular weight carbohydrate from Swedish barley starch. It's specially formulated for elite athletes to provide a truly effective, problem free carbohydrate energy source for performance enhancement and glycogen loading. Vitargo® has been clinically tested and compared with other ordinary carbohydrate sport drinks. The results showed that Vitargo® passes through the stomach 80% quicker, and that it replenishes muscle glycogen levels 70% faster! What it all means is that:

- Vitargo® stays in the stomach for just a very short time and therefore does not cause discomfort during physical activity.

- Vitargo® provides usable energy the fastest.
- Vitargo® does not pull water from the body's reserves, quite the opposite, it can actually increase your hydration level by acting as a sort of a pump.
- Vitargo® guarantees the fastest and most complete glycogen loading!
- Vitargo® is significantly better than dextrose, maltodextrin, sucrose or any other kind of carbohydrate!

**Flavors:** unflavored, orange **Sizes:** 900 g – 30 servings

## MENTAL FOCUS

### Physical & mental performance booster

Acetyl L-Carnitine can pass through the blood-brain barrier and increase the neurotransmitters dopamine, acetylcholine, and prevent a drop in the level of testosterone after exercise. ALC creates alertness, improves cognitive function and memory. It's also anti-catabolic. Tyrosine is an energizer, neurotransmitter enhancer and anti-catabolic amino acid. Physical overload lowers the level of neurotransmitters. This exhaustion can be partially responsible for fatigue and overtraining. Tyrosine helps to restore the optimal levels of neurotransmitters resulting in immediate improvement in performance. It's little known that caffeine provides the effects that we expect from coffee. Coffee has hundreds of chemicals in it, some of which cancel out the positive effects of caffeine. When pure caffeine is taken in optimal doses, significant performance enhancement, pain and muscle soreness reduction have been shown. Caffeine also stimulates the central nervous system increasing alertness, mental focus, and boosts metabolic rate.

#### Sizes:

90 capsules – 90 servings

## TURBO BURN

### Energizing liquid fat burner complex

TURBO BURN is a fast acting, stimulant energizer and fat burner. However, TURBO BURN is less stimulant than LIQUID SHOCK. L-carnitine plays a crucial role in fat breakdown and energy production. It's needed to form a shuttle system that transports fatty acids into the mitochondria of cells to be burned off. L-carnitine is beneficial for fat loss, cardiovascular metabolism, exercise performance and recovery. Caffeine has significant performance enhancing (physical and mental), pain and muscle soreness reducing effects. It also stimulates the central nervous system increasing alertness, mental focus, and boosts metabolic rate. Taurine is involved in many metabolic processes and is essential under certain circumstances. It has an insulin mimicking effect and is a cell-volumizer. These functions ensure that by expanding the muscle cells, the most anabolic state can be achieved in which cell hydration, protein synthesis and muscle fullness is the greatest. Taurine is important for the brain and nervous system, for proper cardiac function, and it's a constituent of bile. TURBO BURN is fortified with a Vitamin B complex that supports and increases the rate of metabolism; optimizes muscle tone and nervous system function; assists in the availability of energy and the formation of important neurotransmitters.

# LIQUID GUARANA

## Guarana “express injector”

Guarana is a natural, herbal source of caffeine and other phytochemicals. It's useful for increasing energy levels, cognitive performance (focus, concentration), and it is also a great tool for dieting because it suppresses appetite and aids in the use of bodyfat for fuel. Liquid Guarana is fortified with a vitamin matrix. Our liquid formula allows fast and efficient absorption.

## CARNI MATRIX

### Designer matrix of 5 carnitine types

L-Carnitine is a safe and effective amino acid-like substance that plays a crucial role in fat breakdown and energy production in the human body. It is absolutely needed to form a shuttle system that transports fatty acids into the mitochondria of cells to be burned off. The L-Carnitine base molecule is beneficial for fat loss, cardiovascular metabolism, exercise performance and recovery.

CARNI MATRIX is a drink powder made with our PENTACARN designer matrix of five types of advanced carnitine forms. PENTACARN provides “dual-action” carnitines that act not only via their carnitine content, but with their stabilizing molecules they have special effects on energy metabolism, cardiovascular function, blood flow and brain function (alertness, improved cognitive function, memory). CARNI MATRIX is also anti-catabolic.

Aspartame-free.

# CARNI COMPLEX

## L-carnitine & acetyl L-carnitine 1200 mg mega caps

L-Carnitine is a safe and effective amino acid-like substance that plays a crucial role in fat breakdown and energy production in the human body. It is absolutely needed to form a shuttle system that transports fatty acids into the mitochondria of cells to be burned off. L-Carnitine is beneficial for fat loss, cardiovascular metabolism, exercise performance and recovery.

Acetyl-L-Carnitine is the acetylated form of L-carnitine that can easily pass through the blood-brain barrier and initiate a cascade of increases in the neurotransmitters dopamine, acetylcholine, and prevent a drop in the level of testosterone after exercise. ALC creates alertness, improves cognitive function and memory. It is also anti-catabolic.

### Sizes:

# CREATINE FORMULAS

76-93

## TRANS-X

### The ultimate cell volumizer transport system

Trans-X is the new millennium cell-volumizer creatine transport system. It features all the effective cell volumizing and ATP regenerating substances combined with a third-generation transport system. Trans-X is the ultimate anabolic supplement for the fastest muscle strength and size gains. The powerful dose of creatine with ribose will create an unbeatable synergistic effect. Glutamine is included to make sure the body is in an anabolic state and the immune system is supported. The 81 g dose of dextrose is part of the third-generation transport system. Upon consumption – augmented by the presence of arginine – the insulin response will be sufficiently quick and strong so that the body can maximally utilize all the anabolic ingredients in Trans-X. Moreover, taken at strategically determined times, like right after training or upon awakening, our formula helps to maximally reload the exhausted muscle glycogen stores.

# TRANS-X PROFESSIONAL

## Creatine cell volumizer transport formula

Trans-X Professional is the state-of-the-art version of our popular creatine transport system. It features all the effective cell volumizing and ATP regenerating substances combined with a third-generation transport system. The creatine component has been upgraded to our best selling ATTACK! creatine matrix, and we did the same with glutamine, now the G-BOMB super glutamine matrix is in our formula! Instead of simple arginine, we now have the HEMO-NO nitric oxide booster arginine complex for maximum nutrient transport and incredible pumps. HEMO-NO and our insulin maximizers guarantee that the active ingredient utilization will be optimal. Also, Trans-X Professional features the carnosine booster beta-alanine that is an effective strength and performance enhancer. Trans-X Professional is the ultimate creatine based anabolic supplement for the fastest muscle strength and size gains. Glutamine is included to make sure the body is in an anabolic state and the immune system is supported. The significant dose of dextrose is part of the third-generation transport system. Upon consumption – augmented by the presence of insulin maximizer – the insulin response will be sufficiently quick and strong so that the body can maximally utilize all the anabolic ingredients. Moreover, taken at strategically determined times, like right after training or upon awakening, our formula helps to maximally reload the exhausted muscle glycogen stores. Trans-X Professional is aspartame free!

**Flavors:** blood orange **Sizes:** 1816 g – 18 servings

# ATTACK!

## Ultra advanced cell volumizer & NO booster

Attack the weights and your muscle cells with unparalleled ferocity with the help of our ultra advanced cell volumizer & NO booster formula. You'll experience unlimited pumps, strength, mass and energy! For maximum cell volumization and strength enhancement, we have a multi-vector matrix of advanced creatines and taurines. We attack from all angles! Even if you've traditionally been a creatine non-responder, our matrix with extra glycocyamine will provide you with an edge. And not only have we taken care of absorption, we included a strong blend of state-of-the-art insulin mimickers to actually push the nutrients into the cells. Express delivery between the site of absorption and cellular uptake is guaranteed by our nitric oxide boosters that will give you enhanced blood flow and also incredible pumps. Citrulline malate will help you by providing extra energy during training, by lactic acid and ammonia removal, and also by increased ATP and phosphocreatine recovery post-workout.

Attack! is a sugar free, zero calorie Formula!

# CREA-BOMB

## Designer multi-vector creatine matrix

There's always strength in diversity and team work. Don't take part in the futile debate of which creatine is the best – take them all! Carpet bomb your muscle cells with every important version of creatine with CREA-BOMB. Our formula provides some "double-action" creatines: these creatine compounds are chemically bound to other substances that provide an extra functionality, an ergogenic (performance enhancing) effect on their own and not just increased creatine utilization.

## ALKALY-X

### Advanced Kre-Alkalyn® performance & muscle enhancer

ALKALY-X is an advanced Kre-Alkalyn® performance and muscle mass enhancer formula. Kre-Alkalyn® is a patented pharmaceutical form of creatine monohydrate. It is "pH correct", buffered to prevent the pH sensitive creatine's conversion to useless creatinine. With this technology and the inclusion of BioPerine® maximum absorption and potency can be achieved with no side effects. ALKALY-X also contains the powerful trio of beta-alanine, arginine alpha ketoglutarate and citrulline malate. They are responsible for boosting nitric oxide for vasodilation (enhanced pumps and nutrient/oxygen transport), increasing muscle carnosine that is a super effective strength and performance enhancer, and buffering fatigue causing byproducts. Arginine has been shown to promote growth hormone and insulin secretion resulting in anabolic effects. Vitargo® is a unique, patented high molecular weight designer carbohydrate that's unparalleled in its ability to quickly leave the stomach (no bloat), boost insulin levels, and maximally restore glycogen stores fast.

# VITARGO CRX

## The ultimate complex creatine formula

Welcome to the “best of” of the supplement world and the ultimate complex creatine formula. When striving for more lean muscle, more brute strength and energy, you want to use the best creatines, carbohydrates and other muscle cell volumizers and insulin potentiator agents. Vitargo CRX covers all angles!

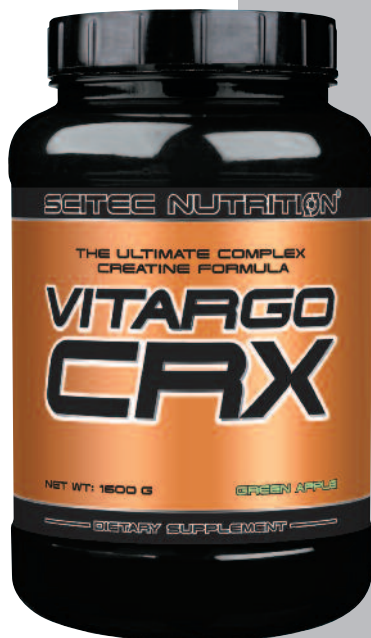

Vitargo CRX is a zero sugar formula that contains no inferior carbs, only pure Vitargo®! Vitargo® is a unique, patented high molecular weight carbohydrate from barley starch (average molecular weight 500,000-700,000) that is unparalleled in its ability to quickly leave the stomach (no bloat) and to restore maximum glycogen levels. Vitargo CRX has the best, most bioavailable and most stable creatines, glutamines, taurines, arginines and insulin potentiators!

## MEGA KRE-ALKALYN®

### Patented super stable creatine

Kre-Alkalyn® is a patented pharmaceutical form of creatine monohydrate. It is "pH-correct™", buffered to prevent the pH sensitive creatine's conversion to useless creatinine in liquids. With this technology maximum absorption and potency can be achieved with no side effects. Also, smaller doses are possible compared to regular creatines. Kre-Alkalyn® is the only creatine product in the world with a pH above 12 because its molecules are synthesized using a patented manufacturing process to correct its pH. As a result, it remains completely stable and reaches muscle cells at full strength. Kre-Alkalyn® effectively delays the onset of lactic acid production.

# 3CM

## TriCreatine Malate

Creatine is the greatest non-caloric supplement to positively effect muscle cell-volume, ATP regeneration, strength and muscle gains. TriCreatine Malate is three creatine molecules chemically bonded with one molecule of malic acid thereby creating a new, designer creatine. Malic acid is a Krebs cycle intermediate substance that helps to provide energy to the body. With malic acid "built-in", this novel creatine complex is more effectively able to boost the ATP energy system leading to more strength, muscle mass and greater recovery capacity. TriCreatine Malate is also more water-soluble than regular creatine monohydrate, which eliminates the possibility of gastric distress and provides greater bioavailability over regular creatine monohydrate.

### Sizes

90 capsules – 30 servings

### Supplement Facts

Serving size: 3 capsules

Amount per serving		% Daily Value
Calories 25 kcal	Calories from Fat 0 kcal	
TriCreatine Malate	2340 mg	†

† Daily Value not established.

# CE-EXTREME

## Creatine ethyl ester

CE-EXTREME is the most advanced, esterified form of creatine, creatine ethyl ester (CEE). This compound is virtually perfectly stable and absorbable, much more so than regular creatines. Also, CEE – due to its lipophilic (fat soluble) nature – is able to travel across cell membranes effectively reaching first the bloodstream from the intestines, then from the blood the inside of the muscle cells where it produces the desired ergogenic effect.

CEE causes no bloating and minimal water retention. Also, you need to take much less CEE than creatine monohydrate.

## CREABOSE

### Creatine + ribose: the ultimate cell-energy booster

Creatine monohydrate and ribose are the best individual cell-volumizers and cell-energizers, but in combination they provide an even more pronounced synergistic effect. With Creabose, your muscle cells will receive support from two different, but not totally independent directions, pathways. The ability of ribose to stop the total breakdown of ATP in the muscle cells during hard work enhances the effect of creatine. Creabose therefore is a super combo of anabolic ingredients for maximum lean mass and strength gains.

# CREATINE PYRUVATE

## Pure creatine pyruvate

CREATINE PYRUVATE is a compound formed when pyruvic acid is bonded with creatine monohydrate. Creatine Monohydrate is one of the most effective supplements ever introduced for enhancing athletic performance. Creatine and pyruvic acid are both produced naturally in the body and utilized primarily by muscle tissue. In its bonded form creatine pyruvate can be up to 5 times more effective than other creatine and pyruvic compounds alone. The reason for this extraordinary effect may be due to the body's increased absorption of creatine pyruvate. Scitec Nutrition's CREATINE PYRUVATE offers 700 mg of active ingredients in a 60/40 ratio, each capsule providing 420 mg of creatine monohydrate and 280 mg of pyruvic acid.

**Sizes:** 100 capsules – 50 servings

# 100% CREATINE

## 100% pure creatine monohydrate

Creatine monohydrate has started the revolution of sport supplements in the early 90's by delivering steroid-like results naturally for the first time. The creatine pool in your muscles is responsible for donating phosphate groups to regenerate used up ATP, therefore it serves as cell energy reserve for muscle contractions. In addition, creatine is able to boost cell volume inducing higher muscle protein synthesis. Creatine monohydrate has been proven in hundreds of clinical studies to increase the total muscle creatine pool comprising of free creatine and creatine

# CREAXIN

## Designer multi-vector creatine super-matrix

There's never really one single best solution in life: not one magic training program, diet or even creatine form. Some people may react differently to the various kinds of creatines. So don't take part in the futile debate of which creatine is the best – take them all in our super-matrix! Our formula provides some "double-action" creatine compounds where creatine is chemically bound to other substances that provide extra functionality, an ergogenic (performance enhancing) effect on their own and not just increased creatine absorption. CREAXIN, besides 9 creatine types, also contains two of the best insulin mimicking agents that boost actual utilization in the muscle cells.

# KREA-RX

## Enhanced Kre-Alkalyn® performance formula

Kre-Alkalyn® is a patented pharmaceutical form of creatine monohydrate. It is "pH-correct™", buffered to prevent the pH sensitive creatine's conversion to useless creatinine. With this technology maximum absorption and potency can be achieved with no side effects, and smaller doses are possible. Kre-Alkalyn® is the only creatine with a pH above 12 because its molecules are synthesized using a patented manufacturing process to correct its pH. As a result, it remains completely stable and reaches muscle cells at full strength. It also effectively delays the onset of lactic acid production. Beta-alanine increases carnitine that has acid buffering, antioxidant, free radical scavenging and even neurotransmitter properties. It can increase your capacity to fight acid build up in working muscles. Citrulline malate reduces lactic acid and ammonia build up, and speeds muscle recovery. It also boosts NO (nitric oxide) levels for better pumps, enhanced oxygen and nutrient delivery.

# MEGA CREATINE

## Pure HPLC tested creatine monohydrate

Over 95% of the creatine in your body is stored within the muscle cells. These cells can store more creatine than what you normally get from your daily diet. By supplementing your diet with Scitec Nutrition's pure creatine monohydrate, your muscles will retain more creatine, thus you will have more reserve fuel for intense training which results in increased power. Besides that, creatine supplementation promotes cell volumization where your muscles become bigger and new muscle growth takes place at an accelerated rate. Cell volumizing promotes intra-cellular hydration. When your muscles swell up with creatine and water, you will have an extraordinary pump during training. The power provided by creatine is unmatched in its ability to help your muscles work harder and longer. One of the mechanisms behind that is the buffering of lactic acid build up during training.

# MICRONTEC

## Micro particle creatine

MicronTec Creatine is manufactured with a more sophisticated particle micronization technology that results in a finer creatine monohydrate powder with 20 times larger surface area. Creatine utilization – and the overall effect – depends on the speed and efficiency of absorption of the substance. That process conversely is dependent on the solubility of the creatine powder. Compared to standard creatine monohydrate, our MicronTec Creatine – due to its larger number of particles hence much greater surface area – is significantly more soluble, much more quickly absorbed, and ultimately more effective. At the same time, the chances of negative side effects, stomach discomfort are greatly reduced, the product is much more user friendly.

Creatine monohydrate is the most scientifically proven non-caloric anabolic sport supplement available for fast and large gains in lean muscle mass, strength and power.

# PUMP-FX

## Super efficient, sugar free effervescent creatine transport system

A conventional creatine monohydrate powder formula is not totally efficient because it doesn't readily dissolve in water, thus it is not absorbed optimally leading to lack of results in a few non-responder, and might cause stomach discomfort. Pump Sport FX has 5 grams of creatine per serving! Considering that our high-tech effervescent delivery technology maximizes the absorption process, our 5 gram dose of creatine may equal 10 grams of simple powders! Pump Sport FX "pre-digests" the creatine outside the body creating free creatine that dissolves and absorbs completely. Also, our formula changes the stomach pH so that the stomach is „tricked“ to dump its content into the small intestine starting the actual absorption process quickly. Since the rate of absorption is maximal, the required creatine dose is significantly lower compared to all previously known formulas.

# TRANS-FX

## Cell-volumizer effervescent creatine

TRANS-FX high-tech effervescent creatine transport formula is the sugar-free alternative to the popular powdered Trans-X. Some people don't tolerate well high amounts of simple sugars, or deliberately try to stay away from them for physique enhancement purposes. Now, TRANS-FX has zero carbs, but delivers an ample dose of creatine and several amino acids for maximum cell- volumizing effect. Considering that our high-tech effervescent delivery technology maximizes the absorption process, our 5 gram dose of creatine equals 10 grams of simple powders!

# OROSTRONG

## Tricreatine orotate

Everybody knows by now the incredible effect of creatine on cell-volume, ATP regeneration, strength and muscle gains. Now, with a match made in heaven, orotic acid enters the supplement world to further strengthen the results provided by creatine. Orotic acid by itself enhances and maintains the ATP pool in muscle cells, increases glucose uptake (greater glycogen storage), boosts ribose and carnosine formation among other functions. The enhancement of carnosine brings about a powerful buffering effect, so muscle performance will be hindered by acidity later than usual.

OroStrong contains chemically bonded creatine and orotic acid, and this novel creatine complex provides the synergistic power of the individual constituents.

# GLUTAMINE FORMULAS

---

94-99

# G-BOMB

## Multi-vector super glutamine matrix

L-glutamine – extremely well-known and popular – makes up 60% of the amino acid pool in skeletal muscles and is in great demand throughout the body. It is used in the gut and immune system extensively to maintain optimal health. Glutamine boosts protein synthesis, reduces muscle breakdown and cortisol levels, and enhances cell volumization. Additionally, glutamine can elevate growth hormone levels by up to 400%! That's not all, this amino acid stabilizes blood sugar levels, it can increase glycogen stores, and reduces sugar cravings. After intense training, glutamine levels drop by as much as 50%. The problem with supplements is that they usually only contain the free form L-glutamine that's very sensitive and unstable. It's "hijacked" mainly by the gut and the immune system. Although it's very important to feed these systems for health and to indirectly support an athlete's quest for higher performance and a better body composition, the simple L-glutamine is not destined to affect the muscle cells directly very significantly. To solve this problem, G-BOMB is based on our multi-vector advanced glutamine matrix that has four types of glutamine! We still included free glutamine to feed the gut and the immune system, but the other stable and highly bioavailable forms with their different pharmacokinetic properties are able to reach the muscle cells to provide all the important functions athletes expect from a glutamine supplement.

G-BOMB is now enhanced with additional absorption boosters!

# L-GLUTAMINE

**100% pure and tested**

Glutamine is the most abundant amino acid in the human body. In fact, 60% of the free amino acid pool in the muscles is made up of glutamine indicating its significance. In stress situations, such as during and after an intense training session, the body requires so much glutamine that not enough can be synthesized so it becomes a conditionally essential amino acid. Besides your muscles, the gastro-intestinal tract and the immune system use up a lot of glutamine as a source of energy and for nucleotide production. Benefits of glutamine supplementation:

- » Growth hormone release
- » Muscle cell volumization
- » Increased glycogen synthesis

## Sizes:

300 g – 50 servings

600 g – 100 servings

# GLUTA-FX

## Effervescent cell volumizer glutamine

GLUTA-FX is a unique, effervescent glutamine delivery system that maximizes the absorption process of the crucial amino acid glutamine. Glutamine is conditionally essential: during stress, like intensive training or illness, our muscles and immune system need so much glutamine that the body cannot produce enough and supplementation becomes necessary – glutamine becomes essential. Studies have shown that continuous glutamine supplementation decreases muscle breakdown. Another advantage of glutamine is that it is one of the few amino acids that may considerably raise the natural growth hormone production in the body. Even 2 grams of glutamine taken orally can quadruple GH levels!

**Flavors:** lemon ice tea

**Sizes:** 20 packets – 20 servings

# MEGA GLUTAMINE

## 100% pure and tested L-glutamine

Glutamine is the most abundant amino acid in the human body. In fact, 60% of the free amino acid pool in the muscles is made up of glutamine indicating its significance. In stress situations, such as during and after an intense training session, the body requires so much glutamine that not enough can be synthesized so it becomes a conditionally essential amino acid. Besides your muscles, the gastro-intestinal tract and the immune system use up a lot of glutamine as a source of energy and for nucleotide production. Benefits of glutamine supplementation:

- » Growth hormone release
- » Muscle cell volumization
- » Increased glycogen synthesis
- » Fatigue reduction
- » Immune system boost
- » Healthy liver and intestines

By supplementing with glutamine you will be able to preserve optimal glutamine levels and maximize cell volume so you can grow bigger and stronger every time you train!

# GLUTA-RX

## Multi-vector glutamine super-matrix: 4 advanced types of glutamine with absorption enhancers in capsules

Glutamine increases protein synthesis, reduces muscle breakdown and cortisol levels, enhances cell volumization, elevates growth hormone production, stabilizes blood sugar levels, reduces sugar cravings and increases glycogen stores. Free form L- glutamine is very sensitive, unstable and it's mainly "hijacked" by the gut and the immune system. To solve this problem, GLUTA-RX is based on our multi-vector glutamine super-matrix that has four types of glutamine! We still included L-glutamine to feed the gut and the immune system, but the other stable and highly bio-available glutamine forms with their different pharmacokinetic properties are able to reach the muscle cells to provide all the important functions athletes expect from a glutamine supplement.

SCITEC NUTRITION

# AMINO ACID FORMULAS

100-115

## BCAA XPRESS

### The most essential BCAA muscle amino acids

The Branched-Chain Amino Acids are essential both in a strict sense – our bodies can't manufacture them – and because during stress like training or lack of optimal nutrition they are used up first by the muscles. Leucine is one of the essential aminos that belongs to the BCAA group. Cutting-edge scientific results prove that leucine is one of the most important aminos, because it directly stimulates skeletal muscle protein synthesis – high leucine levels in the body is a signal for the anabolic state. Leucine promotes recovery and protects muscle tissues from breakdown (anti-catabolic effect). Leucine has been found useful even when the overall dietary protein intake is high, and even when you combine it with fast digesting protein shakes. BCAA's can also be used by muscles for energy when engaging in high intensity activity.

L-Valine 900 mg	†

† Daily Value not established.

# BCAA-X

## BCAA muscle preservation system

The group of so-called BCAA aminos (Branched-Chain Amino Acids) are essential both in a strict technical sense – since our bodies can't manufacture them – and because during physical stress like training or lack of optimal nutrition they are used up first by the muscles.

BCAA-X is anabolic – it increases protein synthesis and hormone production. It is also anti-catabolic – BCAAs decrease protein breakdown and provide energy for the cells.

# AMINO LIQUID 50, 30

## Full-spectrum amino acid express-loader

Amino Acids are among the most vital nutrients. Our formula provides a full spectrum of aminos, including all the essential and critical amino acids for optimal functioning of the stressed human body and for maximum training results. Our "express loader" amino liquid is the fastest way to feed your muscles with zero fat and insignificant amount of carbohydrate intake!

Fortified with Vitamin B6 for maximal utilization.

AMINO LIQUID 50 is an incredibly concentrated source of amino acids.

# GH SURGE

## Growth hormone releaser amino acids

Natural growth hormone (GH) production often declines with age and may cause loss of lean muscle mass and an increase in fat accumulation in the body. Also, for sporting purposes GH is an important fat burner, muscle builder and regenerating hormone. Increasing it naturally and cheaply can be a great help to transform your body. The select amino acids in our formula help in synergy to raise the natural growth hormone production in your body safely.

**Sizes:** 90 capsules – 30 servings

# LIQUID ARGININE

## Arginine “express injector”

Arginine is a nitric oxide booster: as a precursor to nitric oxide, it dilates blood vessels leading to great pumps, vascularity, and it may increase oxygen levels to the heart and other muscles. Athletes benefit from the improvement of physical exercise capacity and increased blood flow. More nutrients will reach the trained muscle and the fatigue by-products will be flushed out faster and more efficiently resulting in better recovery and more gains. Arginine may increase the healing process of muscle tissue micro-injuries and it may have an impact on insulin output and sensitivity. Our liquid formula allows fast and efficient absorption.

# EGG AMINO

## Egg Amino from the gold standard protein

Egg white protein is still the gold standard among protein sources. The Protein Efficiency Ratio (PER) rates the quality of a protein by the number and proportion of the essential amino acids it contains. Eggs have the highest ranking on the PER scale. Eggs contain all eight essential amino acids in a proportion regarded as the most usable combination of all naturally occurring amino acids. Manufactured in capsule form, Egg Amino allows easy digestion and absorption for fast and maximum assimilation!

## ULTRA AMINO

### Complete milk protein amino caps

ULTRA AMINO is made from rich, complete milk protein to provide all the necessary amino acids. It features high concentrations of glutamine and BCAA's, the most important aminos for muscles. Due to its excellent amino acid profile and digestibility, ULTRA AMINO has a very high biological value and it is one of the few amino acid formulas with a critical anabolic amino acid content close to 50% (BCAA's, arginine, glutamine, tyrosine).

# NO-FX

## Effervescent nitric oxide enhancer for enhanced pumps and oxygen delivery

Effergin NO-FX is a nutraceutical composition containing supra-physiological amounts of arginine, a natural nitric oxide generator in a special, effervescent delivery system. One of the most remarkable scientific surprises of biochemistry in the 20th century is the discovery of nitric oxide (NO), an inorganic gas that easily travels from cell to cell and regulates many vital physiological functions of the human body. Arginine is known to get poorly absorbed and needs to be stabilized when applied in combinations with other components. Effergin NO-FX contains a large dose of stabilized, highly bioavailable arginine, the natural nitric oxide precursor, and allows an improved cellular nitric oxide release upon oral intake.

hing through your veins. Also, you wish this state would last as long as possible. The reason for this desire is not just the joy of seeing awesome results from your workout immediately, but more importantly the effect of enhanced oxygen and nutrient transport, and increased recovery ability.

HEMO-NO contains not one, but two nitric oxide boosters. Arginine alpha-ketoglutarate and Glycine Arginine Alpha-Ketoglutarate are both advanced forms of arginine. Besides driving NO production, arginine is beneficial for the immune system, and also – in synergism with ornithine – increases natural growth hormone production. To support this function, we added the best form of ornithine, OKG (ornithine alpha-ketoglutarate). In its own right, OKG is also a growth hormone/IGF-1 booster besides strengthening the immune system and scavenging ammonia.

**Sizes:**

120 capsules – 30 servings

# SUPERNATURAL

## Free-form essential amino acid complex

Cutting-edge research has shown that around training only the eight essential amino acids are needed to boost protein synthesis. The non-essential amino acids are not necessary.

The leucine amount is the highest in our product as it is one of the most important amino acids: it actually directly drives skeletal muscle protein synthesis, the leucine level in the body signals an anabolic state. Our formula is made up of free form amino acids so their delivery to muscles is fast.

Scientific results indicate that the response of net muscle protein synthesis to consumption of an essential amino acid solution immediately before weight training is greater than that when the solution is consumed after exercise, primarily because of increased delivery of amino acids to the muscles.

# MEGA ARGININE

## Mega dose arginine capsules

Arginine, as a precursor to nitric oxide, dilates blood vessels leading to great pumps, vascularity, and it may increase oxygen levels to the heart and other muscles. It can also improve penile erections. Athletes benefit from a boost in exercise capacity and increased blood flow. More nutrients will reach the muscles and the fatigue by-products will be flushed out faster and more efficiently resulting in better recovery and more gains. Arginine may increase the healing process of muscle tissue micro-injuries, and it may have a beneficial impact on natural growth hormone production, insulin output and sensitivity.

### Sizes:

90 capsules – 90 servings,

140 capsules – 140 servings

### Supplement Facts

Serving size: 1 capsule

Amount per serving	% Daily Value
L-Arginine	1300 mg †

† Daily Value not established.

# LYSINE

## Essential amino acid L-lysine

L-Lysine is an essential amino acid that's a necessary building block for all protein in the body, and it is found in large amounts in muscle tissue. Lysine plays an important role in calcium absorption, building muscle protein, recovering from injuries, and the body's production of hormones, enzymes and antibodies. Lysine also helps in the formation of collagen, which supports the skin, muscles and joints. Lysine may be beneficial for those with herpes simplex infections. When taking L-arginine, it's advisable to also use lysine otherwise it may stimulate the replication of the herpes virus if you have it. Lysine can be paired with other growth hormone releasing aminos like arginine on an empty stomach before training or going to bed.

### Sizes:

90 capsules – 90 servings

### Supplement Facts

Serving size: 1 capsule

Amount per serving	% Daily Value
L-Lysine	700 mg †

† Daily Value not established.

# AAKG

## Arginine alpha-ketoglutarate

AAKG, arginine alpha-ketoglutarate is an advanced form of the amino acid arginine because it is bonded with alpha-ketoglutarate that is a key intermediate in the Krebs energy cycle and also in amino acid metabolism. AAKG has been shown to promote growth hormone and insulin secretion resulting in anabolic effects. Arginine is a nitric oxide booster: as a precursor to nitric oxide, it dilates blood vessels leading to great pumps, vascularity, and it may increase oxygen levels to the heart and other muscles.

### Sizes:

100 capsules – 25 servings

### Supplement Facts

Serving size: 4 capsules

Amount per serving	% Daily Value
L-Arginine Alpha-Ketoglutarate	3200 mg †

† Daily Value not established.

# LEUCINE

## The most important essential amino acid

L-leucine is one of the essential amino acids and also belongs to the BCAA group. Cutting-edge scientific results prove that leucine is one of the most important aminos, because it actually directly stimulates skeletal muscle protein synthesis, the leucine level in the body signals an anabolic state. Leucine promotes recovery and protects muscle tissue from breakdown (anti-catabolic effect). Isolated leucine has been found useful even when the overall dietary protein intake is high, and even when you add it to fast digesting protein shakes. Leucine can also be used by muscles for energy when engaging in high intensity activity.

### Sizes:

100 capsules – 25 servings

### Supplement Facts

Serving size: 4 capsules

Amount per serving	% Daily Value
L-Leucine	1800 mg †

† Daily Value not established.

# ORNITHINE

## GH and recovery booster amino

The amino acid ornithine – usually partnered with arginine – stimulates growth hormone (GH) release and it's the stronger one. Some experts say that ornithine may be twice as effective as arginine at stimulating the release of GH. Natural growth hormone production often declines with age and may cause loss of lean muscle mass and an increase in bodyfat. Also, for sporting purposes GH is an important fat burner, muscle builder and regenerating hormone. Increasing it naturally and cheaply can be a great help to transform your body. Ornithine can also help to support the immune system and the body's ability to remove toxins, and promote muscle recovery.

### Sizes:

100 capsules – 100 servings

### Supplement Facts

Serving size: 1 capsule

Amount per serving	% Daily Value
L-ornithine	700 mg †

† Daily Value not established.

# TYROSINE

## Neuro focusing agent

TYROSINE is a nonessential amino acid found naturally in the body. Since TYROSINE is a direct precursor to the neurotransmitters dopamine, norepinephrine and epinephrine, nearly 90% of them are synthesized from TYROSINE directly. Studies show that when these brain neurotransmitter levels decrease there is also a decrease in performance. In this case TYROSINE supplementation can restore norepinephrine levels, thus there is an increase in performance. Taking 2 grams of pure TYROSINE before workouts or whenever you feel tired can significantly boost training performance. Thanks to Scitec Nutrition's 3-WAY TESTING SYSTEM it is one of the highest quality sport supplements available.

### Sizes:

100 capsules – 50 servings

### Supplement Facts

Serving size: 2 capsules

Amount per serving	% Daily Value
L-Tyrosine	1000 mg †

† Daily Value not established.

# TAURINE

## Conditionally essential amino acid

It is clear that taurine is a very important amino acid involved in a large number of metabolic processes and is essential under certain circumstances. For sport-specific purposes, it's important to know that taurine has an insulin mimicking effect and is a cell-volumizer like creatine. These functions ensure that by expanding the muscle cells, the most anabolic state can be achieved in which cell hydration, protein synthesis and muscle fullness is the greatest. Taurine is important for the brain and nervous system, for proper cardiac function, and it's a constituent of bile.

## ACID KILLER

### Down with lactic acid! Pure beta-alanine

Beta-alanine is a building block of carnosine. Antioxidant, buffering, free radical scavenging and even neurotransmitter properties are attributed to carnosine.

Carnosine is found in high concentrations in skeletal muscle, and it's preferentially located in the strongest type II fast-twitch muscle fibers. Carnosine can pick up H(+) ions and delay the drop in pH increasing one's ability to work harder and longer. By boosting carnosine via supplementation, we can increase our capacity to fight acid build up in working muscles.

- No weight gain or bloat!
- No stimulants!
- No other ingredients that prevent effective dosing!
- No banned substances!

# HMB

## $\beta$ -hydroxy $\beta$ -methylbutirate

HMB stands for a compound called Beta-Hydroxy Beta-Methylbutyrate. It is a metabolite of one of the branched chain amino acids (BCAA's) called Leucine. HMB increases the ability of your body to build muscle and burn fat in response to exercise. According to the "Journal of Applied Physiology" athletes who were supplemented with 3 grams of HMB daily for 3 weeks gained 3 times as much lean body mass and increased their strength two and half times greater than those who followed the same training program but did not use HMB.

# MEGA HMB

## $\beta$ -hydroxy $\beta$ -methylbutirate

HMB (Beta-Hydroxy Beta-Methylbutyrate) is a metabolite of one of the branched chain amino acids (BCAA's) called leucine. HMB increases the ability of your body to build muscle and burn fat in response to exercise. According to numerous studies, athletes who supplemented with 3 grams of HMB daily for 3 weeks gained 3 times as much lean body mass and increased their strength two and half times greater than those who followed the same training program, but did not use HMB. HMB is especially useful when embarking on a new training regimen, or when training is unusually intense.

## OPTI-SLIN

### Insulin & glucose management formula

OPTI-SLIN is a complex formula to optimize the management of glucose and insulin. 4-Hydroxyisoleucine extracted from Fenugreek activates both insulin signaling and insulin secretion. It has a glucose-dependent insulin-stimulating effect that promotes muscle cell glucose uptake and glycogen synthesis. Alpha Lipoic Acid is a universal antioxidant and nutrient partitioning agent that improves mitochondrial function, insulin sensitivity and the formation of glycogen in muscles. Cinnamon extract improves the action of insulin by increasing the glucose uptake by the cells and enhances the insulin-signaling pathway in muscle. It also lowers fasting plasma glucose levels. Chromium is an essential nutrient involved in carbohydrate metabolism. Chromium levels may decrease with age and from exercise. Chromium requirements are increased with glucose intolerance (lowered insulin sensitivity) and diabetes. It is recommended to enhance glucose disposal and insulin function.

#### Sizes:

## MYOMETH

### Methoxyflavone és ecdysterone anabolikus és anti-katabolikus formula

A MyoMeth egy anabolikus, tehát izomépzítő, és lipolitikus, vagyis zsírégető tulajdonságú flavon formula, melynek hatalmas előnye, hogy nem hormonális hatású! Ez azt jelenti, hogy a hormonok és pro-hormonok mellékhatásai nem jelentkeznek használata során. A MyoMeth képes fokozni a nitrogén, a foszfor és a kalcium beépülését, valamint növeli a fehérje-szintézis ütemét, ezzel is mutatva a termék anabolikus erejét. A MyoMeth hatóanyagai kísérletekben képesek voltak pár hét alatt 7-10%-kal növelni a tiszta izomtömeg gyarapodását, és egyszerre ugyanennyivel csökkenteni a testszírt is! Mindemellett az ecdysterone erős anti-oxidáns is.

# GRAPE SEED

## Superb anti-oxidant

Grape (*vitis vinifera*) seed extract standardized to contain 95% polyphenols including oligomeric proanthocyanidin (OPC). Grape seed is one of the most potent anti-oxidants found in nature. Anti-oxidants prevent oxidative damage to cells. The polyphenols in grape seed extract provide greater protection against free radicals and DNA damage than the typical anti-oxidant vitamins!

# NATURAL TESTOSTERONE BOOSTERS

---

124-127

## TRIBU-X

### Pro testosterone formula

Research indicates that the steroidal saponins, particularly protodioscin, are responsible for the pharmacological activities of tribulus. Tribu-X stimulates luteinizing hormone (LH) production in the anterior pituitary gland, which in turn stimulates your own testosterone production.

#### Sizes:

90 capsules – 90 servings

#### Supplement Facts

Serving size: 1 capsule

Tribulus terrestris 1200 mg (containing 90% total saponins, including 20% protodioscin, the most active ingredient)	†

† Daily Value not established.

# TESTOPUMP

## Testosterone and sexual power enhancer

Our TESTOPUMP SUPER-MATRIX contains several ingredients to maximize your testosterone levels and increase your sexual power! Tribulus terrestris stimulates luteinizing hormone (LH) production in the anterior pituitary gland, which in turn stimulates your own testosterone production. Research indicates that the steroidal saponins, particularly protodioscin, are responsible for the pharmacological activities of tribulus. Our TRIBU-X tribulus is a very concentrated source of these saponins. The testosterone boosting function is now also supported by D-aspartic acid, a clinically proven ingredient! L-carnitine and acetyl L-carnitine are included to help prevent a drop in the level of testosterone due to everyday- and exercise-stress, and to upregulate androgen receptors maximizing the effects of testosterone. Arginine dilates blood vessels thus increasing erection.

### Sizes:

# MONSTER 100

## Top of the line multi vitamin and mineral based performance enhancer pak with numerous extras

MONSTER 100 is a professional, top of the line multi-vitamin and mineral based performance enhancer training pak with numerous extras. Vitamins and minerals are very basic essential nutrients that must be adequately provided for optimal health and high level sports performance. However, in today's toxic environment and with the ubiquity of nutrient deficient foods, we need to rely on precision supplementation to protect and support the human body. The MONSTER 100 PAK covers all areas besides vitamins and minerals. It provides a green nutrients blend with digestive enzymes. It delivers direct performance enhancers including MAX ATP, a patented, orally effective ATP source! A critical essential amino acid matrix is responsible for the protection of muscle tissues and the extra protein synthesis in response to hard training! Potent nitric oxide (NO) boosters are included for amazing pumps and better oxygen and nutrient delivery. MONSTER 100 wouldn't be complete without strong fat burners with our PENTACARN 5-component L-Carnitine matrix, a joint support blend, and 90% Tribulus to boost your testosterone production!

**Sizes:** 30 packets – 30 servings

# JUMBO PAK

## All-in-One muscle & performance maximizer

JUMBO PAK is a full-strength multi-vitamin and mineral based training pak with 12 tablets/capsules. Vitamins and minerals are very basic essential nutrients that must be adequately provided for optimal health and high level sports performance. However, in today's toxic environment and with the ubiquity of nutrient deficient foods, we need to rely on precision supplementation to protect and support the human body. Our multi-vitamin tablet is strengthened by the addition of a Vitamin C + rose hips capsule and a Calcium-Magnesium tablet. An amino acid matrix with essential and anabolic amino acids is responsible for the protection of muscle tissues and the extra protein synthesis in response to hard training! This amino complex includes energizing, neurotransmitter-boosting and muscle-cell volumizing amino acids to maximize training intensity and the following muscle-building response. Also, potent nitric oxide (NO) boosters are included for skin-bursting pumps and increased oxygen and nutrient delivery. JUMBO PAK enhances fat utilization, fat burning by the addition of our PENTACARN five-component L-carnitine matrix. The vitalizing, strength-boosting CREA-BOMB creatine matrix is also included! Extra glutamine is delivered in the form of our G-BOMB glutamine super-matrix. The effect of the ingredients is potentiated by the addition of absorption boosters!

# MULTI PRO

## Professional level multi-vitamin and mineral formula

MULTI PRO is a professional level multi-vitamin and mineral formula in a packet of six tablets/capsules. Vitamins and minerals are very basic essential nutrients that must be adequately provided for optimal health and high level sports performance. However, in today's toxic environment and with the availability of mostly nutrient deficient food, we need to rely on precision supplementation to safeguard the human body. MULTI PRO provides a wide variety of anti-oxidants including selenium and grape seed extract. We also included an essential omega-3 fish oil capsule, a lecithin capsule, and cell-energizing Coenzyme Q-10.

# VITA-C 1100

## Ascorbic acid

As a water-soluble nutrient, Vitamin C helps fight the cell-damaging free radicals that can lead to oxidative stress and the premature aging of cells. Vitamin C promotes immune system health. Vitamin C is also essential for the regeneration processes after sport injury and for healthy joints.

### Sizes:

100 capsules – 100 servings

### Supplement Facts

Serving size: 1 capsule

Amount per serving	% Daily Value	
Vitamin C	1,100 mg	1,833%
(as Ascorbic Acid)		

# MEGA DAILY ONE

## Multi-vitamin and mineral

## Sustained release

Mega Daily One is a super high potency multi-vitamin and mineral complex. Mega Daily One also contains lipotropic factors for lean muscle mass and digestive enzymes to help you break down and utilize your foods. This product is formulated for the serious athlete who needs to be on the cutting edge. All athletes realize the importance of using the right combination of vitamins and minerals to give the body all of the nutrients it craves to perform to its maximum potential.

### Sizes:

orange-mandarine

Sizes:  
1000 ml – 40 servings

## VITAMIN D3

### Super important vitamin

Deficiency of Vitamin D has been linked to bone and joint problems, kidney problems, impaired respiratory function, and tooth decay. Vitamin D malnutrition may also increase susceptibility to several chronic diseases. Vitamin D's optimal level enhances both immune and thyroid function, and supports maximal sports-performance throughout the year. Vitamin D is naturally produced by the body when exposed to direct sunlight, however actual UV ray exposure and vitamin D synthesis are dependent on many factors (seasons, location, time, age, smog, skin darkness, etc.)

#### Sizes:

250 capsules – 250 servings

#### Supplement Facts

Serving size: 1 capsule

	Amount per serving	% DV
Vitamin D3	500 IU	125%

## ARTHROXON

**Cutting-edge joint care formula with novel ingredients in a 6 component matrix. Faster acting!**

ARTHROXON is a cutting-edge joint care formula based on our 6 component matrix that includes novel ingredients in addition to the usual ones. NEM® is natural eggshell membrane that's made of the exact same ingredients as human joints. It's been clinically proven to provide relief in most cases in 7-10 days as opposed to weeks or months. ARTHROXON also contains the more effective type II collagen, and also hyaluronic acid.

**Sizes:** 108 capsules – 21 servings

### Supplement Facts

Serving size: 5 capsules

Amount per serving	% Daily Value
<b>ARTHROXON SUPER-MATRIX</b> 3130 mg	†
(glucosamine sulfate, hydrolyzed chicken sternal type II collagen, chondroitin sulfate, methylsulfonylmethane [MSM], hyaluronic acid, NEM®: natural eggshell membrane)	

† Daily Value not established.

# JOINT-X

## Complete joint care formula

The cartilage cells produce mucopolysaccharides-protein complexes like chondroitin sulfate. These molecules are built into the cartilage matrix, pick up water and improve joint flexibility. As a result of hydration, joints can resist hard strain and shocks. Chondroitin protects even the healthy joints by inhibiting the production of joint degenerating enzymes. Chondroitin is able to suppress the pain of chronic osteoarthritis and reduce the need for nonsteroidal anti-inflammatory drugs (NSAID's). The most important aspect of this product is that the components do not have any side effects unlike NSAID's! Glucosamine is similar to chondroitin and the two have synergistic benefits. Methylsulfonylmethane (MSM) is a natural source of sulfur and is commonly used for helping to treat or prevent osteoarthritis. Gelatin is a component of collagen that is the basis of connective tissue structure.

### Sizes:

100 capsules – 100 servings

### Supplement Facts

Serving size: 1 capsule

Amount per serving		% Daily Value
Glucosamine Sulfate	350 mg	†
Gelatin	125 mg	†
Chondroitin Sulfate	100 mg	†
MSM (methylsulfonylmethane)	50 mg	†

† Daily Value not established.

## COLLAGEN LIQUID

### Body-structure supporting hydrolyzed collagen

Collagen is a tough, fibrous protein that's an important constituent of bone, cartilage, tendons, ligaments and other connective tissues (skin, nails, hair). For protective and restorative purposes we need to provide collagen material for our body. Our hydrolyzed – already broken down – liquid formula provides quickly utilizable collagen for maximum effect.

**Flavors:** wild berry

**Sizes:**  
1000 ml – 40 servings

## JOINT-X LIQUID

### Multi-vector joint support matrix

Joint-X Liquid is a complete joint care formula.

The ingredients support:

- improved joint lubrication
- cartilage repair
- reduction of swelling, inflammation and pain
- joint strength and flexibility
- skin, hair and nail quality

**Flavors:**  
mirabelle-orange

**Sizes:**  
500 ml – 20 servings

# MEGA GLUCOSAMINE

## Glucosamine sulfate for joint health

Glucosamine helps to keep joint cartilage healthy by increasing its water and nutrient content in its matrix. Glucosamine may help regenerate cartilage if it becomes damaged, thereby restoring joint function and mobility. Glucosamine also functions as an effective pain reliever and anti-inflammatory agent.

Synergists of glucosamine include MSM, chondroitin and collagen. When combined, they may enhance joint health and relieve joint pain the best.

### Sizes:

100 capsules – 100 servings

### Supplement Facts

Serving size: 1 capsule

Amount per serving	% Daily Value
Glucosamine Sulfate	1000 mg †

† Daily Value not established.

# MEGA MSM

## Methylsulfonylmethane for joint health

MSM is a great organic source of sulfur that is used for its joint health benefits and anti-inflammatory action that can help recovery. MSM is often destroyed in the processing and storage of foods. With our single ingredient MSM formula you can use a more precise dosage (in combination with other joint supporting ingredients) that you feel yields the best results for you. Synergists of MSM include glucosamine, chondroitin and collagen. When combined, they may enhance joint health and relieve joint pain the best.

### Sizes:

100 capsules – 100 servings

### Supplement Facts

Serving size: 1 capsule

Methylsulfonylmethane (MSM)	800 mg †

† Daily Value not established.

SCITEC NUTRITION

---

# ESSENTIALS

---

144-157

## B-100

### Strong vitamin B complex

B-100 is made up of several vitamins that work well together to support nervous system health. B-complex vitamins also promote energy metabolism. Each nutrient in B-100 performs a unique role in maintaining proper metabolic functioning, and is essential for well-being.

#### Sizes:

100 tablets – 100 servings

## BETA-CAROTENE

### Vitamin A precursor 15 mg

Beta-Carotene is an anti-oxidant, immune system and eye health enhancer, and a provitamin of Vitamin A. As a precursor, it is needed by the retina of the eye in the form of a specific metabolite, the light-absorbing molecule retinal. This molecule is necessary for both scotopic and color vision. Beta-Carotene has such important functions as: vision, immune function, gene transcription, embryonic development, bone metabolism, formation of blood cellular components, skin health, antioxidant activity, reproductive systems.

#### Sizes:

90 capsules – 90 servings

## BROMELAIN

### Natural enzyme with anti-inflammatory and digestive aid functions

Bromelain, naturally found in pineapple, is an enzyme that's great for improving digestion, especially of protein, so it's very useful when large amounts are consumed. It also has anti-inflammatory properties that help reduce muscle and joint pain and swelling simply caused by intense workouts or by an injury.

#### Sizes:

90 tablets – 90 servings

## C-500

**500 mg Vitamin C  
for more flexible  
dosing**

As a water-soluble nutrient, Vitamin C helps fight the cell-damaging free radicals that can lead to oxidative stress and the premature aging of cells. Vitamin C promotes immune system health. Vitamin C is also essential for the regeneration processes after sport injury and for healthy joints.

**Sizes:**

100 capsules – 100 servings

## C-1000

**1000 mg strong  
Vitamin C**

As a water-soluble nutrient, Vitamin C helps fight the cell-damaging free radicals that can lead to oxidative stress and the premature aging of cells. Vitamin C also promotes immune system health.

**Sizes:**

100 capsules – 100 servings

## CALCIUM- MAGNESIUM

**Chelated minerals  
for maximum  
absorption**

Our formula is a high quality calcium-magnesium supplement that delivers 500 mg calcium and 250 mg magnesium in a chelated form for optimal absorption. Calcium is the primary mineral responsible for strong bones, and it has an important role in proper muscle contractions. Magnesium is also involved in proper bone mineralization, muscle contractions and nerve impulses.

**Sizes:**

100 tablets – 100 servings

## CHROMIUM PICOLINATE

### **Yeast free**

Chromium, an essential mineral, is needed for proper carbohydrate metabolism and to help keep blood sugar levels optimal: the effects of chromium deficiency may include low blood sugar or insulin resistance. Inadequate chromium intake is a possible contributing factor to insulin resistance (diabetes), obesity and hypoglycemia (low blood sugar).

#### **Sizes:**

100 tablets – 100 servings

## CLA

### **Conjugated linoleic acid for diet support**

CLA is a weight management ingredient. CLA can aid to achieve our body shape goals by decreasing body fat and increasing muscle mass. CLA works by preventing fat accumulation in fat cells. Fat enters the cells through a “door” that is controlled by an enzyme (“key”). By acting on this enzyme CLA keeps the “door” locked and fat can’t enter the cells thereby not allowing the amount of fat to increase in the cells. The less fat that is present in the cells, the smaller and less mature they become, and this helps to reduce the level of fat in the body. The increased breakdown of fat helps to fuel and preserve muscle mass, which in turn increases muscle mass, important for a high metabolic rate and good appearance.

#### **Sizes:**

60 capsules – 30 servings

## COLON CLEANSER

### **For colon health With psyllium husk**

COLON CLEANSER uses Psyllium Seed Husk, Aloe Vera Leaf and Lactobacillus Acidophilus among other ingredients to help cleanse your colon and promote regularity.

#### **Sizes:**

100 capsules – 16 servings

## CO-Q10, CO-Q10<sup>50</sup>

### **Coenzyme Q-10 with absorption enhancing Q-Sorb™**

Coenzyme Q-10 is an antioxidant with a great variety of benefits. Co-Q10 has been reported to support the cardiovascular system, cognitive function and nervous system health. Additionally, it plays a role in helping the body convert food to energy. Coenzyme Q-10 also promotes the recycling of Vitamin E in the body, and can be absorbed into the outer layers of the skin to provide its beneficial properties.

Although Co-Q10 is naturally found in every cell in the human body, scientific studies suggest that Co-Q10 levels decline with age. Those taking Statin medication for their cholesterol should be especially aware of how much Co-Q10 they are getting from their diets, since Statins can reduce Co-Q10 levels in the body.

#### **Sizes:**

100 capsules – 100 servings

## DAILY VITA-MIN

### **Vitamins and minerals – Easy to swallow tablets**

Daily Vita-Min is a special multi-formula with beta-carotene. Each tablet provides essential nutrients, long acting B-complex and C vitamins, plus essential minerals including chromium, selenium and zinc. All in a natural base of bioflavonoids, rutin, rose hips, yeast, kelp and dolomite.

Totally free of sugar, starch, salt, preservatives and color dyes.

#### **Sizes:**

75 tablets – 75 servings

## FLAX

### **Cold pressed organic high lignan flax oil**

Flax is one of the premium sources of Alpha-Linolenic Acid (Omega-3) and Linoleic Acid (Omega-6), two essential fatty acids that can't be made by the body and must be obtained from the diet. In addition, high lignan flax oil is a great source of lignans – phytochemicals, which play a part in the well-being of the body.

Our flax oil is derived from 100% organic flax, so it's free from chemicals, pesticides and herbicides.

#### **Sizes:**

100 capsules – 100 servings

## GARLIC & PARSLEY

### **Health support with odorless garlic**

Garlic and parsley support optimal cholesterol levels and cardiovascular health.

#### **Sizes:**

100 capsules – 100 servings

## GINKGO BILOBA

### **Memory enhancer 24% ginkgo flavone glycosides**

Research highlights the ability of Ginkgo to maintain peripheral circulation to the arms, legs and brain. In addition, Ginkgo helps improve memory, especially milder memory problems associated with aging. Our Ginkgo Biloba product contains high-quality herbs standardized to provide 24% Ginkgo Flavone Glycosides.

#### **Sizes:**

100 capsules – 100 servings

## GREENS

**Concentrated  
green foods  
Natural  
nutrients**

Nutrient dense green foods provide potent and essential nutrients.

**Sizes:**  
60 tablets – 20 servings

## GINSENG

**500 mg Korean  
Ginseng  
Finely milled for  
quick release**

Korean Ginseng has some powerful effects: it has been shown to elevate mood, increase energy, and give a positive sense of well-being. It is used as a tonic, stimulant and regenerator.

**Sizes:**  
100 capsules – 100 servings

## GUARANA

**2400 mg  
Fat loss and  
cognitive enhancer**

Guarana is a natural, herbal source of caffeine and other phytochemicals. It's useful for increasing energy levels, cognitive performance (focus, concentration), and it is also a great tool for dieting, because it suppresses appetite and aids in the use of bodyfat for fuel. In laboratory experiments guarana increased memory retention, physical endurance, alertness and mood when compared with a placebo. Other clinical studies showed antioxidant and antibacterial effects, and also fat cell reduction! Our Guarana is fortified with calcium that is also beneficial during dieting.

**Sizes:**  
100 tablets – 50 servings

## JOINT HEALTH

**Complex joint  
formula**

The active ingredients in Joint Health strengthen the complex connective tissue matrix that is responsible for cushioning joints and bones. Glucosamine is in the formula to help provide the building blocks for supporting cartilage, chondroitin to help maintain joint cartilage, and MSM – an organic source of sulfur – plus other vitamins and minerals designed to nourish and enhance the body's support structures. Joint Health is great for anyone seeking extra nutritional support for joints.

### Sizes

60 capsules – 20 servings

## LACTASE

**Lactase Enzyme  
Digestive aid for  
lactose intolerance**

Lactase is a digestive enzyme that helps break down the sugar in milk and dairy products. This product supports digestive health with lactase enzyme (*Aspergillus oryzae*). Lactase can make milk more digestible, so this product is ideal for people with lactose intolerance. This enzyme may also help reduce the effects of poor digestion, including heartburn, gas and other occasional gastrointestinal discomforts.

### Sizes:

100 capsules – 33 servings

## LECITHIN

**Ultra soya lecithin  
1200 mg natural  
lecithin**

Lecithin is a fatlike substance called phospholipid. It is composed mostly of B vitamins, phosphoric acid, choline, linoleic acid and inositol. Lecithin contains all the phosphatides found naturally in cell membranes. Lecithin works by maintaining cell membrane structure and increasing cell membrane fluidity.

Each Lecithin softgel capsule provides you with 1200 mg of natural lecithin extracted from soybeans.

### Sizes:

100 capsules – 100 servings

## LIVER AID

### **Milk thistle 1000 mg**

Liver Aid contains milk thistle, a source of silymarin, which may be one of the most potent liver-protecting substances known. It appears to both prevent damage to the liver and stimulate new growth of liver cells to replace damaged cells. The exceptional antioxidant benefits of Liver Aid are useful for anybody taking medications (including steroids), and for those who are exposed to environmental toxins (big city pollution, chemicals, etc.)

#### **Sizes:**

80 capsules – 80 servings

## LUTEIN

### **6 mg natural carotenoid Contains 48 mcg Zeaxanthin**

Lutein, a natural carotenoid, has antioxidant properties and supports eye and skin health. Our formula contains 6 mg of Lutein per capsule that includes 48 mcg of Zeaxanthin (the other carotenoid contained within the retina of the eye).

#### **Sizes:**

90 capsules – 90 servings

## MAN POWER

### Unique herb blend for manly performance

MAN POWER is a unique blend of natural herbal ingredients which has been specially formulated for men. Korean ginseng has been added to this mix for its role in improving physical performance.

**Sizes:**

80 capsules – 80 servings

## MELATONIN

### Sleep aid 3 mg

Melatonin is a natural hormone produced by our bodies, and besides its powerful antioxidant properties (cell protection), it is a regulator of our sleep cycle. As a supplement, Melatonin is mainly used to ensure restful, energizing sleep.

**Sizes:**

90 tablets – 90 servings

## MULTI-ENZYME

### Absorb more nutrients

MULTI-ENZYME is a digestive aid for all three macronutrients: proteins, fats and carbohydrates. Enzymes break down the nutritional components of proteins, fats and carbohydrates, making these nutrients available for the body's energy needs, cell growth and other vital functions. Remember: "You are what you absorb from what you eat!" This product may also help reduce the effects of poor digestion, including heartburn, gas and other occasional gastrointestinal discomforts.

**Sizes:**

100 tablets – 50 servings

## OMEGA-3

**Essential fatty acids  
EPA/DHA from  
fish oil**

Our essential fatty acid formula contains EPA and DHA, two fatty acids that help support and maintain the health of your cardiovascular system. Omega-3 fatty acids are considered one of the “good” fats important for cellular, heart and metabolic health. Our high dose capsules guarantee that you get an effective amount of essential fatty acids easily!

**Sizes:**  
100 capsules – 100 servings

## SELENIUM

**Yeast-sourced  
50 mcg**

The trace mineral selenium is a powerful antioxidant that supports the immune system and may help to ward off disease. The ever decreasing quality of soil and therefore foods, and higher activity levels warrant selenium supplementation.

**Sizes:**  
100 tablets – 100 servings

## SHARK CARTILAGE

**Natural joint  
support  
Pure, freeze dried**

This formula contains pure, freeze dried shark cartilage for joint support purposes. It is a natural source of Chondroitin Sulfate, which is an important structural component in our joint cartilage. Each serving delivers 740 mg shark cartilage powder.

**Sizes:**  
60 capsules – 60 servings

## VITAMINE E

**100% natural  
antioxidant  
400 IU**

Vitamin E is a well-known, powerful antioxidant that helps fight free radicals. Studies have reported that oxidative stress caused by free radicals may contribute to the premature aging of cells. Vitamin E also strengthens immune function and helps support cardiovascular health. Our Vitamin E is 100% natural.

**Sizes:**  
100 capsules – 100 servings

## WATER CONTROL

**Natural diuretic  
Extra strength**

WATER CONTROL contains the essential mineral potassium, which works with sodium to regulate the body's water balance. Our extra strength formula also includes Juniper and Parsley for maximum effect.

**Sizes:**  
100 tablets – 100 servings

## YUCCA

### **Yucca Schidigera 450 mg from natural whole herb**

High grade Yucca Schidigera extract has a considerable number of uses, the natural plant saponins address many human maladies. Native Americans used the soapy leaves from Yucca for numerous conditions: inflammation of all sorts, including joint inflammations, and bleeding were treated with this special herb.

We use only the finest quality herbs. Each is screened and finely milled for quick release. Preservative-free gelatin capsules contain pure milled herb powder.

**Sizes:**

100 capsules – 100 servings

## ZINC

### **Chelated mineral 50 mg**

Zinc is a mineral that is involved in thousands of bodily functions, from proper cell growth to testosterone production in men, from enzyme activity to optimal immune functioning. This is the only metal, which appears in all enzyme classes. Zinc helps speed up the healing process after an injury and also can be part of an effective treatment for age-related macular degeneration. The reality is that physical activity, modern food processing and aging can lead to zinc deficiency. Avoiding that is essential for strong immune functioning, overall health and sports performance!

**Sizes:**

100 tablets – 100 servings
